LT. COMMANDER J. Jerome Williams, 27902 Brandywine, Farmington, checks aircraft pilot tube during routine flight inspection as Commander Graydon S. Owen of Rochester, Michigan, looks on. Williams was among 56 Naval Air Reservists participating recently in a two week tour of duty with Fleet Tactical Support Squadron 734 at the Naval Air Station, Memphis, Tenn.

Kiwanis Programs Swing Into High Gear in April

With Program chairman Tom Adecock making the contacts and President Charley Merryman conducting high level meetings, the men of Farmington Kiwanis find themselves being treated to the "mostest and the bestest".

In the near past Merryman rallied 14 of his men to attend the divisional meeting in Birmingham. Eighteen turned out to meet with the local Lions club at Mary's Inn on Tuesday April 12th. Plans are being made for the entire membership to attend the 23rd Annual Windsor International Meeting on April 26th where the speaker will be Walter F. Patenge, Kiwanis International Treasurer who hails from Lansing Michigan.

Wednesday April 20th found the Farmington Kiwanians the guests of the Oak Park Kiwanis Club. The meeting was held in the Oak Park Community building and was very well attended. Farmington's own Dr. Ron Clark, M.D. was the speaker for the evening.

His excellent color slides and the knowledge he gained of the Russians on his recent medical tour visit has brought many requests for his time as a Kiwanis program speaker. His luncheon talk to the Kiwanians of the Ferndale club on "A Woman's Place in Russian Industry" brought a new insight of the Russian women to our Ferndale friends.

Immediately after the meeting Dr. Clark left for a 3 day seminar with the Executive Board of the American Association of Physicians and Surgeons who will meet in Chicago. He also plans a visit to the Kiwanis International Offices which are located in the Windy City.

The MAC Wheelers are well known in Detroit and the Suburban area for their wheel chair square dancing because they have participated in many clubs, organizations, TV shows and have won a trophy for their square dancing exhibition at the State Fair.

Future plans and hopes include square dancing tournaments in other states. This is the only square dance group for the handicapped persons in Michigan. Mark Smith and Frank Wilcock of Troy have donated their time to call dances for this group.

The Levis and Lane Club are an intermediate square dance group with Harry Johnson as caller. They will meet at Middlefield School from 8:30 to 11:30. Interested square dancers are welcomed to come.

QUESTIONS & ANSWERS ABOUT BUILT-IN ELECTRIC HEAT

Electric heat is an advanced and superior concept of home comfort. Here are some of the questions we've been asked about it.

WHAT DOES IT LOOK LIKE?
The four most widely used types are illustrated below. Because electric heat is built in, there is little interference with living space.

DOES IT NEED MAINTENANCE?
No. There are no moving parts in the electric heating systems described here except in the forced air units where fans or blowers are used. Fans and blowers are silent, so they are long lasting also. An added advantage of electric heat, depending upon the type, is its completely silent, or very quiet, operation.

WHAT MAKES ELECTRIC HEAT BETTER?
FLEXIBILITY—Each room has its own thermostat. So each remains at the temperature you choose without affecting other areas. Temperatures can be raised or lowered in any room without overheating or chilling the rest of the house. Just a touch on the proper thermostat does it.

SPEED—When a thermostat is adjusted to call for more heat, the response is fast! The systems described here, the heat source is right in each unit—only inches away instead of many feet.

EVEN HEAT—There will be very little temperature difference between floor and ceiling. And, wherever possible, electric heat (except ceiling cable, of course) is installed in outside walls. Then there is a curtain of warm air between the pool wall and window surfaces and room occupants. This funds off chilling drafts.

CLEANLINESS—Nothing is burned to make smoke, soot or fumes. Air currents will carry only whatever dust may have been introduced by other means. Nor are large quantities of outside, potentially dusty air drawn into the house to support combustion. Result: walls, draperies, furniture and floor coverings stay clean longer.

ARE THERE OTHER TYPES OF ELECTRIC HEAT?
Yes, the flexibility of electric heat makes it adaptable to many heat systems. For example, there are electric warm air and wet heat systems.

WHERE CAN I SEE ELECTRIC HEAT?
And a feature of every Gold Medal Home is its electric heating system. Watch for announcements of Gold Medal Home openings.

WHERE CAN I GET MORE INFORMATION?
There's free literature at your Edison office, or mail the coupon below. Another source, especially for a cost estimate, is the electric heating contractor who displays this emblem.

The contractor who displays the emblem has had special training in the Gold Medal Home to estimate your heating needs accurately. He has also pledged himself to meet industry standards of installation.

DETROIT EDISON, ROOM 111, 2140 RECORD AVE., DETROIT 10, MICHIGAN

Please send your free illustrated booklet, "Electric Home Heating."

Name (Please Print) _____
Address _____
City _____ Zone _____

IS IT SAFE?
It's as safe and troublefree as electric light. Electric heat does not work with open flames like your toaster does. However, most of them operate at relatively low temperatures—without glowing wires.

IS IT EFFICIENT?
The heat produced by electric systems is usable heat; practically none of it is wasted within the heating equipment itself. Electric heat is just about as close to 100 percent efficiency as it's humanly possible to get.

IS IT EXPENSIVE TO INSTALL?
In general, the original cost of a electric heating system is less than that of any other type of quality equipment. Actual installed cost will vary according to type of heating unit used, home size, method of home construction and additional insulation requirements.

A good time to install electric heat is when building a new home. But it's also very economical to install it when home alterations or additions are being made. Wiring is no problem. It's figured as part of the job.

CAN I PUT IT IN JUST ONE ROOM?
Yes, and economically, too, as indicated above. Typical examples when you're adding a new room, finishing an upstairs, closing in a porch or breezeway. Electric heat is especially valuable when the new living space is a long way from the central heating system, or when the central system is already working to capacity. Another good time to use electric heat is when you have a hard-to-heat area.

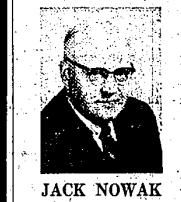

CAN I PUT IT IN THE WHOLE HOUSE?
Yes, you can switch the whole house over to electric heat. In this case, additional insulation will be required, plus storm and storm doors all around.

For greatest heating economy and summer comfort, regardless of type of heating system, good insulation pays off. Industry standards call for a rough rule of thumb: insulation thickness is not less than 6" overhead; 8 1/2" in outside walls; 2" alongside and partially under concrete floor slabs. Floors above basements also need insulation.

WHAT DOES IT COST TO USE ELECTRIC HEAT?
Various factors, including family living habits, affect operating cost; so a hard-and-fast answer is less than a rule of thumb is 25¢-28¢ per square foot of heated space, annually. But there's little need to guess: An electric heating contractor can calculate actual costs and operating cost quickly and accurately.

Electric heat will cost more. But the cost will probably not be as high as one would imagine. Like any quality product, you pay more for electric heat but you get more benefit.

Get My Deal On A 1960 Pontiac Before you buy

JACK NOWAK

That's right, let's get acquainted. I'm a resident of Farmington and am associated with:

BERRY & ATCHINSON PONTIAC
at 874 W. Ann Arbor Road (M-14) in Plymouth where the overhead is low and the service best.

A phone call will have a demo at your door.

Suspend Licenses

During the past week the driving licenses of 611 Michigan drivers were suspended and those of 103 were revoked.

Cowan on LiT Alum. Program

Carl Cowan, 32303 Old Forge Lane, Farmington, is on the executive committee for the annual Alumni Dinner Dance of the Lawrence Institute of Technology to be held Saturday night at 201 at Bolston, Grand River and Eight Mile.

The program will include the presentation by Mr. Cowan, LiT. Alumni Association president, of the Annual Alumni Award to a person who has made an outstanding contribution to the organization's progress.

Chairman of the event is Reed Abbott, who also is vice president of the Alumni Association.

Dinner is scheduled for 7 p.m. and dance to follow at 8:15 p.m. in the same ballroom where the late Henry Ford and Mrs. Ford regularly attended old-time dances.
