Celebrate 25th Anniversary Of Westfalls

Sunday, April 24 marked the 25th wedding anniversary of Mr. and Mrs. Harold Westfall and the occasion was celebrated with a gala reception at the Westfalls home. The party was planned by the Misses Diane and Judith Westfall.

The original bridal party consisted of two, was held for celebration. Many friends and relatives who attended the wedding were also present for the reception. The Farmington High School Orchestra provided music for the afternoon.

Mr. and Mrs. Westfall have been long residents of Farmington and are active in community affairs as well as church and fraternal activities. It was quite a coincidence that Sunday's unusually warm weather was a duplicate of the wedding day weather conditions 25 years ago.

The good wishes of all in attendance were extended to the Westfalls with hopes that all would get together again in another 25 years to celebrate the golden anniversary.

Knolls Women Meet May 4

The Franklin Knolls Women's Club will have a dessert Luncheon on Wednesday, May 4, at the Shepherd King Lutheran Church, Maple and Middlebelt Rds.

Mr. Wong of the Northland Garden Center will be the guest speaker. A plant exchange will also be held, the proceeds of which will be given for draperies to the Elmwood Training School in Farmington. The plants to be donated may be house or garden varieties, and should be put in plastic bags for ease of handling.

The welfare committee reported that they have already made draperies for three rooms at the Elmwood Training School but more are still badly needed so cooperation in this effort will be greatly appreciated.

Election of new officers will also be held. The slate to be presented is: Helen Pettibone, President; Phyllis Pavel, 1st Vice President; Rox Kavieff, Recording Secretary; Tillie Lacombe, Corresponding Secretary, and Carol McCoy, Treasurer.

The Cancer Society Group announcing the following meetings: Mrs. Jo Grum, April 28, at 8:00 p.m. and Mrs. Phyllis Pavel, May 9 at noon.

400 Economists Gather at MSU

About 400 home economists will gather at the Michigan State University campus this week. Thursday, April 28, brings members of the Michigan Dietetic Association to Kellogg Center. On Friday, April 29, they are joined by members of the Michigan Home Economics Association for a joint session.

Program highlights are the White House Conference on Children and Youth, just held, and the White House Conference on Aging scheduled for 1961. The M.H.E.A. will hold a separate meeting on Saturday, April 30. Climaxing the conference is "Average Nutrition" by luncheon speaker Mrs. Sigman Earle, and editor of Seventeen magazine.

Shallow drawers or pull-out trays are ideal for storing table linens. Home economists at Michigan State University say they wrinkle less in shallow than in deep drawers.

MARIE LONG GR. 4-3114

Hello again and 'thanks' to all my fine column friends who remembered me with cards and flowers during my recent illness.

Susan Lin, daughter of Lt. and Mrs. Charles Urquhart of Fort Knox, Kentucky, was christened on Easter Sunday, April 17, at the First Presbyterian Church of Farmington. Mrs. Urquhart is the former Carol Reed, daughter of the James M. Reeds of Wesley Drive.

Mrs. Fred Davis and children, Jerry Lynn and Frederick Bruce, of Grand River Ave. flew to Florida for a 2 1/2 week vacation with Mrs. Davis' parents, Mr. and Mrs. V. Maple, at Lakeland. They also did some fishing at Vero Beach. On the return trip they left Mrs. Davis' parents in Indiana and then Mrs. Davis and children came on by train. Dr. Davis remained at home.

FASCINATING FACTS ABOUT NATURAL GAS

Invisible Calculation

How to measure something shapeless, weightless and invisible—that was the problem of the GAS industry years ago! At that time customers were billed by the number of burners or "lights" on their premises. To limit hours of use, GAS company inspectors made rounds at a specified time each evening, night striking an iron bar to warn their GAS.

Visible Accuracy

Measuring GAS consumption is no longer a haphazard affair. The lightweight, durable, dependable and accurate GAS meter in use today is constructed on the principle of "breathing." The flow of GAS is regulated and measured by a mechanical pair of "lungs" which inhales GAS from the mains and exhales GAS to the customer's burner. GAS meters, one of man's most accurate measuring devices, are tested constantly.*

* To maintain this high degree of accuracy, all GAS meters on Consumers Power Company lines are placed on a regular, systematic testing and replacement schedule.
