 tudebaker's packed 3860 mod-
 retail deliveries "normal-
 ed of 1959 sales with 94,515
 June 30 compared with 91,110
 year ago, it was announced
 S. A. Skillman, vice president
 of general sales manager.

ames Monroe was President
 of the U.S. when Florida was
 chased from Spain.

Wood Creek Farms Village
ANNE M. PHILLIPS MA. 6-6335

Sorry not to have gotten a
 column in last week but I was
 too busy finding you some fine
 new neighbors. Connie and Ed
 Biegelow in a new bought the
 Blanchfields' charming home,
 and with their almost 11 year
 old son, Timmy, will be moving
 in the latter part of August. We
 will miss the Blanchfields, I'm
 sure.

When I catch up with the
 Holdens it is quite an event—
 they are such a busy couple.
 June 23 Sheila and Bill drove
 up to South Ste. Marie for the
 annual Michigan Press Association
 summer outing. Headquarters
 were the Ojibwa Hotel where some 65 news-
 men and their families gathered.
 In addition to visiting and meet-
 ings the scenic cruiser Le Voy-
 ageur was chartered to take them
 through the Locks and will along
 the river. They returned

BILL'S BROTHER, Charles,
 and his two lovely daughters,
 Wendy and Carol, arrived here
 July 1 for a couple of days with
 family. This time, they actually
 stayed with one of Bill and
 Charles' sisters, Mrs. George W.
 Webster, who lives at 13 Mile
 and Lahser Rd. Saturday night
 the Websters had a family din-
 ner party at the Oakland Hills
 Country Club which included
 Sheila and Bill, Charles and his
 two daughters, their own
 daughter and her husband, Mr.
 and Mrs. David Higgins, and
 another sister, Mrs. E. J.
 Bemis.

Charles Holden and his
 daughters were en route from
 Los Angeles to New York City
 where he will be working for
 Video Tape, Inc. His wife is
 visiting her mother and will
 follow along shortly.

Clair Snover got a hole-in-
 one last Friday afternoon at
 the Rochester Golf and Country
 Club. It was the 18th—a par 3
 hole—and he was using a 7
 iron. Congratulations!

JUNE BIEKER, with Bill,
 Sue and Karen, drove to Wash-
 burn, Wis., to spend the day
 with her family there. They
 got back last Thursday.

The Franklin Garden Club
 meets tonight at the Ziegler-
 bours, 7380 Franklin Road. It
 is a picnic at 8:30—an outdoor
 picnic, we hope.

Timely Tips on GARDENING
 By Betty Frankel

LILIES are the reigning beau-
 tifuls in the garden now, and are
 dominating nature's landscape.
 Low, long, undulating bands of
 lawn, orange day lilies, Hemer-
 occallis, fall, and clustering
 beneath tall trees. Here and
 there a sunny field is bright-
 ened by a jewel-like cluster of
 red-orange canvas lilies. The
 flowers, with their curved back
 petals sprinkled with small pur-
 ple spots, hang singly or in
 small nodding clusters from the
 tops of two to five foot stalks.
 In the garden, varieties of
 umbellatum lilies present their
 upturned, orange, speckled flow-
 ers in a less showy but equally
 Perhaps most beautiful of all
 are the tall clumps of stately
 regal lilies. The stems are cloth-
 ed in fine-textured, rich green
 foliage which is a perfect foil
 for the waxy, white trumpet-
 shaped flowers that are born in
 great abundance at the top of
 the stalks. The elongated buds
 are lined with wine color which
 fades to pale pink when the
 flowers open. Deep inside, the
 flower is suffused with light
 lemon yellow, and a lemony,
 spicy sweet scent emanates
 from these beautiful flowers per-
 forming the garden.

AS BEAUTIFUL as the flow-
 ers they visit, are the moths
 and butterflies that "fit" from
 blossom to blossom gathering
 honey, spreading pollen, and
 butterflies do no damage to the
 garden. Some gather nectar
 from the flowers, but many do
 not eat at all when in the wing-
 ed stage. The caterpillars that
 are the larval stage are more
 grotesque in appearance, but
 are often curious to behold and
 beautiful in coloring. Some of
 the caterpillars do little dam-
 age, but other varieties are a
 mong the worst garden pests.
 The beautiful black swallow-
 tail butterfly bears small re-
 semblance to the warty, little
 black and white caterpillar that
 hatches from an egg that looks
 like a drop of honey. This spiny
 little fellow changes skins sev-
 eral times, eventually becoming
 a large, bright green caterpillar
 banded with stripes of vel-
 vety black. Because of a strong
 odor they emit when attacked,
 birds do not care to eat these
 caterpillars. However, these
 caterpillars are not serious
 pests.

Highway Dept. Gets Top Honor

The Institute of Traffic Engineers has honored the Michigan State Highway Department "for maintaining a high level of performance in traffic engineering during 1959."

Michigan was one of only two states to receive an award. California was the other state to be honored. In addition, 37 cities, including Detroit and Grand Rapids, received awards.

The Institute, in a letter to Gov. G. Mennen Williams, praised the Highway Department's Traffic Division for its "continued high level" of performance.

"We compliment the State of Michigan for its efforts in this area so important to the safety and convenience of the motorists using Michigan's highways," the commendation said.

Traffic planning, traffic control measures, traffic improvement and traffic engineering administration were among the items considered in making the awards. Nearly 800 cities and all states submitted entries.

There are two thousand magazine publishing firms in the United States with a total volume of more than one and one-half billion dollars annually.

When they return to the campus in mid-September they will need only to complete their registration and pay their fees to begin classes.

James C. Orr, Linda S. Thomas and Bruce J. Ellis of Farmington are among those who have finished visiting the campus.

Among children 10 to 14, and young people 15 to 19, milk is the favorite beverage — soft drinks are second.

Summer Workshops
 More than 100 students from Canada, New York, Kansas, Michigan, Wisconsin and Maryland are in full swing at the University of Detroit three summer workshops—theatre, radio-TV and journalism.

why there's no water heater like an **ELECTRIC WATER HEATER**

INSTALL ONE WHERE YOU LIKE—EVEN IN AIR-TIGHT CLOSET. When it's an electric water heater, there's no flame, so no air is needed to support combustion. And, of course, there are no fumes to be vented. An electric water heater is completely safe.

BUILT-IN QUALITY MAKES A BIG DIFFERENCE. Every electric water heater installed on Detroit Edison lines must meet Edison's exacting specifications. Result: long life, high performance.

HAVE YOU SEEN THE TABLE TOP MODELS? They're compact, go beneath counters or alongside laundry equipment. Other possibilities—in the kitchen next to sink or dishwasher or in that hard-to-use corner. Upright or table top model, put an electric water heater where you want it.

HOTTER WATER—PLENTY OF IT! An electric water heater is capable of going on and on, delivering really hot water—160° hot—without burning out. And heavy insulation all around keeps the outside shell of the water heater cool to the touch from top to bottom—no hot metal anywhere.

8 OUT OF 10 FAMILIES USE THE 50-GALLON SIZE. For less than 15¢ a day (estimated operating cost for this size) you can have hot water for all the family's needs. There are also 80- and 110-gallon sizes for the few families who use more water and may require heaters with greater capacity.
