Guide To Beauty

In all things of beauty, color comes from beneath the surface. In seeing the beautiful blue ocean, we become entranced by its varying shades of greens and blues. The SPECIFIC purpose of a powder is to set the makeup base and keep it lovely and fresh all day and evening. A tinted powder will cause discoloring, streaking, and caking. After all, when you put one color upon another color you change the color, don't you? And so it is with a color, or tinted powder over a tinted make-up base.
