THURSDAY EVENING Flinders Elementary School combined their open house and dedication ceremonies and had a very good turn out. In all of the children's work and art projects on display, it amazed some of the work and talents these children of ours display.

Take a Break... I Have To Go "FISHING"!

THIS WELL DRILLER IS GOING FISHING, BUT NOT FOR FUN!

To the men who drill gas wells, fishing is not a pleasant pastime—it's a painstaking, tedious job. It means that the well driller has to take his large, heavy, cumbersome tackle (hooks and line) and... fish out drilling tools that have become stuck or broken off deep in the earth. Consumers Power Company, too, has an important and expensive task—that of providing its customers with a dependable supply of natural gas during the cold winter months. To assure a sufficient reserve supply, it has underground storage fields near Marion, Michigan and elsewhere: Natural gas is put back in the earth under a pressure of hundreds of pounds per square inch and withdrawn as needed when gas consumption is highest.
