

Farmington Kiwanis Club To Mark 25th Anniversary

Farmington Kiwanis Club dinner dance is open to anyone interested whether members of the Kiwanis clubs, other service organizations or friends.

Reservation information may be obtained by calling Al McGraw at GR. 4-2943 before Saturday, September 12.

MR. EARL CONFER, past-governor of Kiwanis Michigan District, will speak at the dinner. He is well known in Farmington as a gifted speaker with a talent for delighting his listeners while delivering a meaningful talk.

Following the dinner menu, enjoyable service to the community, especially to the youngsters, stated past-president Lloyd Smith, who went on to emphasize that the informal

Obscene Telephone Caller Reported

An alleged physician, purporting to be conducting a cancer study, is using women in the Southeastern Michigan area as a target for obscene and insulting questions; the Michigan Cancer Foundation learned today.

Reports of the telephone calls have come in from scattered areas including Harper Woods, Birmingham and Livonia indicating that the man lives in the metropolitan Detroit area and apparently is using community newspapers as sources for his victims. All women contacted have had their names published in recent issues of a local newspaper.

Neither the Michigan Cancer Foundation nor any other cancer control agency in this area is conducting this type of survey. E. W. Tuescher, Executive Vice President of the Foundation, said.

... Frost can be expected around the middle of September so collect boxes, baskets, old sheets or blankets and store them in a convenient place. ... The tender annuals such as marigolds and zinnias and you may be rewarded with an additional crop of flowers. Frost are often followed by a lengthy frost-free period. ... Plant, too, to cover some of the tomatoes to plants. ... Bring in your plants and spend the summer outdoors.

Timely Tips on GARDENING

By Betty Frankel

JAPANESE GARDENS in five groups surrounded by pale gray turkey gravel pebbles are planted in wave-like patterns. No plants are in the garden except for a bit of moss at the base of some of the rocks. The abstract picture created is intended to encourage quiet contemplation, and to stimulate the imagination. It is decorative, simple with a perfection difficult to match.

Rather than trying to copy Japanese gardens, the average American gardener would do better to seek to understand the philosophy that underlies these gardens—the "Harmony of force, of nature, of spirit" which underlies the universe—they are at the "just right"

... to incorporate this harmony and simplicity into his garden within the framework of our own regional styles.

REMINERS—Seed laws: Plant evergreens. ... Dig and transplant perennials. ... Plant the small bulbs of the earliest-blooming Spring flowers. ... Some lilies can be planted at this time if bulbs are available. ... If you plan to plant a sugar maple tree later in the Fall pick it out when the foliage has turned color as this color varies from individual to individual. ... Make landscape plans on paper before purchasing or planting, and check about the mature size of the plants so each room will be allotted to enough plant. ... Plan to plant delicate trees and shrubs after fall. ... Check the bean vines for a second crop. ... Continue harvesting fruits and vegetables from the garden when they underlie the universe—they are at the "just right"

Citizen Criticizes Publisher's Comments

To The Enterprise: This is a copy of a letter I sent to the Observer. It would be greatly appreciated if you would print it.

Dear Mr. Chandler, I have never before written a letter to a newspaper, but you editorial comment on page 1 of the last Observer forces me to write. Your insulting and arbitrary classification of a group of Farmington Township citizens as "petty politicians, hysterical and/or ill informed" has disturbed many of us.

We were present at the zoning meeting you mention in your letter to a newspaper, but you were not. I wish to inform you that no one was hysterical, and that we were probably much better informed on the so-called "Village Green" than you might wish. You are a politician, but we are only citizens who have a citizen's interest in events that affect us all deeply. We are from "Old Homestead," my husband is an attorney, and I am a college graduate with a degree in chemistry. We are not given to hysterical behavior, nor are we given to espousing causes without sufficient information.

WE OBJECT strongly to the rezoning proposal for the following reasons:

1. There is no need to rezone. The property is beautiful and ideal for homes such as you find in Old Homestead—homes priced \$25,000-\$45,000 on half-acre lots, custom built, in other words, the best type of property. Moreover, a dangerous precedent will have been set if first-class property can be arbitrarily rezoned. This is not a hardship case for the landowners.

2. The property will be fantastically overbuilt. I give you the following example: Herman Gardens: 2160 units, \$50 sq. ft. average each on 142 acres (City of Detroit figures). Village Green: 2000 units, \$50 sq. ft. average motel, shopping, on 160 acres.

HAVE YOU ever seen Herman Gardens, Mr. Chandler? A more congested area can hardly be imagined. Such a complex of brick and asphalt for parking 2000-3000 cars will be ugly beyond belief. We are not taken by the golf course. Herman Gardens has as much green area per building as Mr. Duke will have, as the above acreage figures prove.

Nearly 2500 local medical residents in Indonesia, South Viet Nam, Peru, and Ecuador have been trained by the more than 600 American physicians, dentists, nurses and technicians who have served aboard the hospital ship S.S. HOPE.

20. The traffic and parking problem will be enormous. The daily influx and outgo of an idealistic minimum of 2000 cars in this district area poses a real hazard. These cars will flow down all around us from 12 Mile Road after leaving the school. We will be passing the school to be built at 11 Mile and Halsted.

21. All adjoining properties will be subject to undesirable rezoning. Experience has shown this in areas all over the country.

22. THE GENERAL character of the whole area will be altered. Our property, which is valuable because of its beauty, seclusion and privacy, will be less valuable as first-class residential property. People looking for space on which to build the larger and more expensive homes will build elsewhere.

23. There is considerable sentiment against multiple housing of any sort in the township, as you would have observed if you had been at this zoning meeting. A plan for apartments of a much more expensive and luxurious nature was refused by the board, partly because the homeowners in the area objected so strenuously.

Now, there are many other arguments (and we are not entirely misled by the will-the-wisp of tax relief), but I truly believe that these are the main reasons the people will be very unhappy should the Village Green ever come into being. I wish we had a newspaper at our disposal to trumpet our side of the story, but we are only citizens, and can influence only by our vote, but of course we have no vote on this affair. But at least I us speak. If you are fair, Mr. Chandler, you will present this on page one without cutting or comment, as you gave air to your own personal views. Farmington does not need its own Herman Gardens, and we don't want it.

Irene Larson (Mrs. Joseph H. Larson)

24. Twenty-seven nurses who served aboard the hospital ship S.S. HOPE during its recently concluded ten-month visit to Ecuador will also be of the ship during its coming mission to Guinea.

25. The temple garden is also a flat garden and as first developed became known for beautiful proportions and landscape scenery. Later they became sanctuaries for meditation and contemplation, with simplicity the key to the design. The Ryuzan Temple stone garden in Kyoto is the most famous of these gardens. This 500-year-old garden has recently been reproduced in this country at the Brooklyn Botanic Garden in New York. Fifteen rocks brought from Japan are placed
