# To Women It May Concern

By Louise Kuder

Every once and again the basket on the woman's desk marked "misc." overflows to the floor and then it is time to share it with you.

An eye-catcher on the top this week is the wonderful idea of Project "Operation Tree." Sister Maynard, President of Madonna College, was delighted to accept a gift of 300 trees donated to the college campus by Allen Harlan from his estate, 3335 North Adams Road, north of East Maple Road in Birmingham.

There appears to be on the scene a couple of men dedicated to making the life of ladies a happier one. Dr. Francis Rhoades is one. If his idea works ladies clubs will be casting Dr. Rhoades in gold status in the park. He has come up with a pill, which presently is being tested by the U.S. Food and Drug Administration that "can preserve the femininity of females past 40." Older women can regain or keep many of the appearances and feelings of youth by taking a programmed daily series of pills.

Dr. Rhoades told about a 70-year-old widow who took the pills — and by golly it wasn't long before she looked much younger with a sparkle in her eye and a skip in her gait. The doctor said they wouldn't cost more than 10 cents a day and there was increasing evidence they would help prevent cancer. Hope they put on an extra crew and work night and day — some of us could use the skip in our gait.

Senator Edward J. Robinson of Redford Township introduced a bill in the State Senate last week to ban detergents from Michigan that produce so much suds they clog sewers and spoil Michigan's water supply.

If his bill passes after Dec. 31 it will be unlawful to sell in Michigan any of these washday products that leave mountains of suds long after the washing is done, dried, ironed and put away. "We don't want the Detroit River or other rivers or streams in Michigan turned into a cloud of suds," so said the Senator. No longer do we soak ladies — we must get out the board and scrub.

And then there are those around who figured out ways to worry us.

Someone took the time to figure exactly how much the little bundle in hunting is going to cost you and your husband until the time he is 18.

These figures are computed on the basis you have an average child-genius-types are a trifle higher. The sum total of the junior or jinx for the modest income family is \$12,400; for the well-off family \$20,000 — the posh family off-spring wasn't computed.

- Being born, including doctor and hospital: \$200-\$600.
- Minor illnesses: \$1,000. Double or triple that amount if surgery or braces are needed.
- Food (including occasional meals for friends): \$10,000; \$500 less for girls.
- Clothing: \$2,500; higher for a girl.
- Add the costs of "incidentals": haircuts, permanents, toys, entertainment, vacations, music and/or dancing lessons, Sunday school, etc.

How many children did you say you plan to have?
