

Evans Promotes Four to Executive Vice-President Posts

Recent acquisitions and the expansion of Evans Products Company, increasing the scope and size of its operations, have resulted in a change in the management structure of the Company.

The change, announced by Sanford A. Orloff, Chairman, and C. Calvert Knudsen, President, establishes product groups and emphasizes the planning and financial functions of the Company.

Lawrence M. Fishive, formerly Vice President and General Manager of the Plywood Division, has been appointed Executive Vice President in charge of the new Building Products Group with direct supervision over three of the five Evans divisions.

These are: Building Materials Division headquartered in Portland, Ore., the Plywood Division headquartered in Corona, Calif., and the Fiber Products Division headquartered in Corvallis, Ore.

James J. Conway, formerly vice president and General Manager of the Transportation Equipment Division, has been appointed Executive Vice President in charge of the Transportation Equipment Group. This group will include Evans' railcar building and damage-prevention device activities and automotive products, as well as the newly-acquired United States Railway Equipment Company, a Chicago-based railcar lessor, and Chicago Railway Equipment Company, a Chicago freight car door and brake beam manufacturer.

Conway joined Evans Products Company in December 1961 as Corporate Controller. He was formerly Administrative Manager and Financial Assistant to the President of the Automotive Division of the Budd Company.

Prior to that, he has served as Plant Controller and Budget Manager at Budd, and as an accountant with the Securities and Exchange Commission. Conway is a CPA in the state of Pennsylvania and Michigan.

Conway was elected Vice President and General Manager of Evans' Transportation Equipment Division in August 1962. He was appointed Executive Vice President in charge of the Transportation Equipment Group on December 16, 1965. Conway is also a director of Evans Products Company.

A graduate of the University of Pennsylvania, Wharton School, Conway resides with his wife and six children at 33355 Myrna Court, Livonia.

J. Kenneth Brody, formerly Vice President, has been appointed Executive Vice President in charge of the legal, corporate planning and acquisition planning functions of the Company.

Lauren L. Wygal, formerly Vice President, has been appointed Executive Vice President in charge of the financial, control and accounting functions of the Company.

The fifth Evans Division is the Capp-Homes Division, created recently following the acquisition of the Capp-Homes group of companies, leading manufacturer of pre-cut and custom built homes in the Middle West. Max Zamanly has been appointed Vice President and General Manager of this Division, reporting directly to C. Calvert Knudsen, President.

ing directly to C. Calvert Knudsen, President.

Evans is a diversified manufacturer and distributor of related building materials.

Ham It Up For The Holidays

FOR THE VERY BEST CHRISTMAS EVER!

Whether you are planning extra big meals for guests and friends or just holiday supper get-togethers, a semi-boneless ham from your neighborhood Food Fair store will give you twice the eating pleasure and half the work. That's because these lean, juicy hams are specially trimmed of excess fat and bone to give more meat for the money.

And the extra bonus of these semi-boneless hams during this hectic holiday season is that they are fully cooked...ready to eat. That makes them perfect for informal suppers...no muss or bother...just slice and serve. To serve one for Christmas Dinner, just top with your favorite glaze and heat through. M-m-m good!

A HOLIDAY BUY!... NO SLICES REMOVED!
WHOLE OR HALF SEMI-BONELESS

Women Replace Men In Auto Driver's Seat.
EAST LANSING - Women drivers will outnumber men drivers within a few years, according to a report published by Michigan State University. Dr. Daniel D. Gage of Sacramento State College and Dr. Anne C. Garrison of MSU note that the "sexing predominance of women at the wheel will influence car makers to stress safety, dependability and ease of handling. Women are more practical-minded about cars, drive less aggressively than men and have an overall better accident record."
