One of the nice things about owning it is selling it.

A new Volkswagen doesn't depreciate wildly the minute you turn the key. In a sense, the older it gets the more valuable it gets.

So that in 5 years, the same VW will be worth more than some 5-year-old cars that cost twice as much to begin with.

Old VWs are worth a lot because a lot of people want them.

One reason is that it takes a real car nut to tell a clean used one from a new one. VWs always look like VWs.

Another reason is that they hold up.

A VW is put together so well, it's practically airtight. It helps to open a window to close a door. Even on old ones!

And, new VW or old, there's all that nice money you keep saving on gas, oil, tires, insurance, and repairs.

So you can get a nice price for it. If, for some strange reason, you'd want to sell!

It's the kind of economy that people are willing to pay on and on and on.
