NEW OFFICERS of the Rouge Valley Chapter of the Michigan Society of Professional Engineers get together following the annual meeting in the Hillside Inn. The group includes (from left) President Fred Bradley of Plymouth, student members Alan Tope, Pat Ruelie and Bryce Lockwood of Schoolcraft College.

Don't Try Crazy Antics While On Golf Course

Crazy antics on the golf course are taking an increasing accident toll. Players run their motorized carts into trees, bombard one another with golf balls, chop their fellows with clubs, and invite electrocution by playing during thunderstorms.

"Golf is essentially not a dangerous sport," says Gerald F. Montgomery, executive director of the Greater Detroit Safety Council, a chapter of the National Safety Council. "It's only the players who make it hazardous."

Most golfing injuries, Montgomery says, are inflicted by the golf ball that drops from out of nowhere. Such injuries are often slight, for the ball has traveled far enough to lose its speed and impact. But at close range a ball can deliver a fatal knockout blow.

Generally these accidents are caused by a lack of common sense and courtesy. A player gets impatient and tees off before those ahead have played their second shots or are safely out of range—about 200 yards for amateurs.

There's good safety logic behind the courtesy rule that the player farthest from the green always should stay behind the hitter and should not get in front of him until his ball is in the air.

Slices and hooks plague even the pros. Montgomery says that to protect yourself and others, you should give warning if you see someone in the path of your wild shot, and keep on the alert for flying balls from other fairways.

A surprising number of golfers are clobbered by golf clubs. Make sure that bystanders are not within the arc of your swing, and . . . to protect yourself—don't walk behind a person holding a club.

Power carts save time, effort and heart strain. But careless operation can cause them to end up in a creek or against a tree. If turned sharply or driven on steep inclines or in rough areas, they are prone to tip.

At the first sign of rain, says Montgomery, golfers should take shelter. Lightning strikes most often during the muggy lull preceding rain. Standing in the open, the golfer is often the highest object in the area, making him a perfect target for lightning. The nearest lone tree, the classic lightning target, a booby trap. Take shelter in a building or crouch in a ditch or sand trap.

Another major mishap on the course is collapse due to overexertion or heat exhaustion. Montgomery warns. Wearing a hat to keep the sun's rays off the head and face will help. So will taking it easy, especially in the first days until your body is back in shape.

All Saints Church Has Summer School

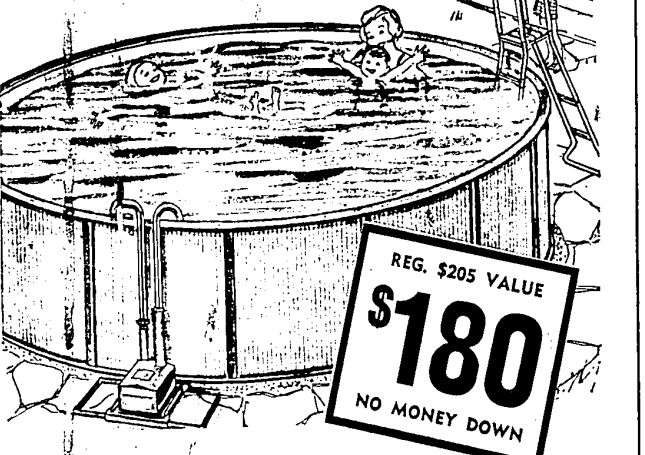

All Saint's Lutheran Church, 8850 Newburgh Road, Livonia, is sponsoring a Vacation Bible School, which started Monday of this week, for children between the ages of three and ninth graders.

Classes will be held daily, Monday through Friday, until July 1. The theme of the school, "My Savior and I." For additional information call Rev. Dale Kreuger at GA 7-9575 or Mrs. Carole Zang at 453-8588.

Deadline Is July 5
Persons who want to vote in the August 2 primary election have less than two weeks left in which to register. The deadline is July 5 and citizens can sign up between 8 a.m. and 8 p.m.

Kaplan Heads Subsidiary Of Evans Plant

Election of Sheldon Kaplan as President of United States Railway Equipment Company has been announced by Montford A. Orloff, Chairman of Evans Products Company.

Kaplan earned his bachelor's degree in mechanical engineering at Massachusetts Institute of Technology, and holds a master of business administration degree from M.I.T. and Harvard Business School. He served in the Navy during World War II.

Prior to joining the United States Railway Equipment Company in 1959, Kaplan was Assistant to the President of the American Steel and Iron Company in Boston, and later Assistant to the President of Hyman-Michael Company in Chicago. He has been Executive Vice President of United States Railway Equipment Company since 1964.

Mr. and Mrs. Kaplan and their two children live in Chicago.
