

### Vanity Lavatory In Bedroom Will Ease Bath Woes

Many new bathrooms being installed these days have vanity lavatories in which the toilet is set into a wide counter-top, with storage space beneath. According to the Plumbing-Heating-Cooling Information Bureau, such "vanities" are also growing in popularity for the bedroom.

They come in so many styles that they fit into the room's overall decor very nicely. And, the Bureau points out, they're a real boon to families in which several children or adults have to get ready for school and work at the same time because they ease the bathroom traffic jam.

NEWEST PRODUCT of the Plymouth Building Products Corp. is a 100-ton flat car equipped with movable bulkheads, being shown to railroad and shipper executives at major railroad centers throughout the United States.

## 100-Ton Flat Car Train Displayed by Evans Firm

A prototype of Evans Products Company's 100-ton Building Products Flat Car equipped with movable bulkheads is now being shown to railroad and shipper executives in a demonstration scheduled for major railroad centers. The car was displayed at the Union Station in Portland, Oregon on October 31. It was shown at the Beale Street Team Track of the Southern Pacific Railroad in San Francisco on November 4. During the week of November 23 it is scheduled for appearance in St. Paul, Minnesota, and in December it will be shown successively in Chicago, St. Louis, Philadelphia, and Washington, D.C.

The new car, in addition to movable self-locking bulkheads, is equipped with Hydra-Cushion sliding sill underframe, a new deck design with convertible sections that form load-bearing pieces, eliminating a need for wooden dunnage, and chain tie-downs which accommodate large variations in length and width of loads. The car was especially designed for the shipment of plywood, lumber, gypsum board, pipe, structural steel and similar building materials. Its two movable bulkheads manually operated by one individual member on roller bearings over a 10' foot range and can be locked at two-inch intervals. The pins and operating handle of the bulkheads are under constant spring tension, assuring automatic locking of the bulkheads when the handles are released. Each bulkhead is 10 1/2' high.

## Homeowners Urged to Check Heating Systems for Winter

Are any of the following things true about your heating system?

1. There's a feeling of draft in one or more rooms.
2. There are cold spots in some rooms.
3. You have to overheat some rooms to make other rooms reasonably comfortable.
4. It's impossible to make some rooms warm enough regardless of what you do.
5. You have one thermostat to regulate the temperature in the entire house.
6. Your fuel bills have gone up in the last two years.

If any of these things are true about your home, it's time for a checkup. The Plumbing-Heating-Cooling Information Bureau says.

The checkup should be performed by a qualified heating contractor who will determine whether you need such new equipment as a boiler, burner, controls, heat distributors or thermostat. If you have an old-fashioned heating plant it may be worth your while to have it entirely replaced.

It's long been known that students are more alert and factory workers more efficient when temperatures are just right. The same thing is true in your home. Your family's health, energy and sense of well-being all depend upon the evenness and quality of your home's heat.

There's another plus factor. At least 10 percent of your home's value is determined by its heating system—an important consideration should you ever decide to sell.

A top-quality type of heat is hydronic hot water.

## Sees Bigger Market For U. S. Sports Cars

LOS ANGELES, Calif. — Domestic sports cars are destined to take a larger share of the automobile market in 1967 and succeeding years, Robert Anderson, general manager of the Chrysler Plymouth Division, said Monday.

Speaking at a news preview of the new Plymouth Barracuda sports cars to be introduced November 25, he said total industry sales of sports car models in 1967 are expected to exceed 1,000,000, including about 800,000 cars of Barracuda size.

He expects those with a comparatively short wheel base, such as the Barracuda with 108 inches, to account for at least 90 per cent of the total volume in the sports car segment of the market.

There are several reasons for this, he said. "First of all, the Barracudas and the cars they will compete against are the least expensive of sports cars, the easiest to buy. Secondly, they are distinctive and the owner can feel that he is expressing a bit of his personality by driving one. Third, they'll do just about anything you can expect a car to do."

Commonwealth Offers \$12 per Cent Interest Bank of the Commonwealth Monday became the first Detroit financial institution to guarantee an effective interest rate for time deposits of 12 per cent. The new rate is the highest bank rate that will be paid on savings certificates of deposit in amounts of \$100 or more held for a period of three years and ten months.

The new rate of 5 1/2 per cent will be paid on 5 per cent savings certificates with interest compounded continuously every minute of every day. This certificate can be redeemed at any time on 90 days notice with the legal maximum of 5 per cent interest paid from the day of deposit to the day of withdrawal.
