

SCHOLARSHIP WINNERS are congratulated by: (from left) Ray Ridge of Ray Chevrolet, Trenton; Gary Reynolds, Chevrolet, West Seven Mile Road, Detroit; Susan Sugai, 17, of 34278 Glover, Wayne, plans to attend Michigan State University; Her special interest is oceanography. She is a senior at Wayne Memorial High School.

Wayne High Senior Wins \$1,000 Award

A young man and woman have been awarded four-year college scholarships by the Greater Detroit Chevrolet Dealers Association. The scholarships are for \$4,000 each.

Gary Reynolds, 18, of 8611 Bluevelt, Grosse Ile, plans to attend Michigan State University to study law. He is a senior at Grosse Ile High School.

Susan Sugai, 17, of 34278 Glover, Wayne, plans to study physics at Oakland University. Her special interest is oceanography. She is a senior at Wayne Memorial High School.

The awards were announced and presented at a reception and dinner at the University Club by Chancellor D. B. Warner, of Oakland University, and Harry Tennyson Chevrolet in Livonia, past president of the DCDA and chairman of the scholarship committee.

This is the fifth year for the DCDA scholarship program. An applicant must be the son or daughter of a full-time employee of one of the association's 31 dealerships.

After a preliminary screening, 21 applicants from 21 high schools in the area took an examination. The committee then chose Reynolds and Miss Sugai from the final field.

The winners are entitled to use the funds at any accredited college. Grants are made on the basis of \$1,000 a year, renewable throughout the four years of undergraduates work provided the recipient remains in good standing.

Tennyson was master of ceremonies. Also at the dinner were other association officials, dealers and their wives; high school and Michigan college educators; and, of course, the winners and their families.

Reynolds is the son of Mr. and Mrs. Sherman Reynolds. His father is with Ray Ridge Chevrolet, 2838 West Jefferson, Trenton.

Miss Sugai is the daughter of Seto F. Sugai. Her father is with Hanley-Dawson Chevrolet, 14501 West Seven Mile.

Cotton still accounts for three-fourths of all fabric going into men's and children's clothing, say textile specialists at Michigan State University.

More than half of the sample group — 1,141 — came from Ann Arbor. They were 277 from Ypsilanti. Twenty or more patients came from each of Belleville, Brighton, Inkster, Milan, Plymouth and Whitmore Lake.

Among this year's total group of patients, were 255 youngsters being seen in the Pedodontics department, and 805 on the roles of the department of Orthodontics.

Slightly more than half of the total "teach" graduate students, and the others meet with undergraduates in the Junior and Senior classes. All corrective treatment however, is carried out under the direct supervision of clinical instructors at the school.

Typically, a lesson that is never forgotten.

Each patient pays a modest fee in order to challenge graduate and undergraduate students with his particular dental problem.

For a few days or weeks, the patient becomes the most important "teacher" on the student's schedule. His health history and immediate dental difficulties, his responses to treatment, and his desires and demands show the student the human side of dentistry; typically, a lesson that is never forgotten.

Blames Complacent Attitude For Juvenile Crime Increase

The vast majority of today's youths have high standards of personal conduct, but there also has been a failure to place greater emphasis on guidance for the smaller percentage who commit criminal acts, Col. Frederick E. Davids, director of the State Police, stated in an address given at Jackson.

One of the most significant factors in the complacent attitude toward youth problems today is the false teaching which tends to blame society for all of the frustrations and woes visited on young people," Davids said.

Teenagers and their parents have been subjected to a foolhardy theory which endorses rebellious conduct against authority, law and order or any regulatory measures which represses their immediate plans and desires. This astonishing belief has spread into the school room, living room, the court room, and now into the streets of our nation in the form of riots and drunken brawls."

Pointing out that between 1961 and 1966 major criminal offenses in Michigan increased three and one half times faster than the increased ability of police to solve such offenses, he said that of 49,388 apprehensions for felony offenses in 1965, 54.3 per cent of those arrested were under 17 years of age.

"In the past three years," he said, "a number of services have been expanded such as detention quarters, half-way houses and camps for young offenders, but from my point of view, not enough has been done. Youth criminals in most cases where treatment and detection are inadequate turn into adult criminals; proper guidance and encouragement at an earlier age is what our youth needs today."

"No doubt society has failed our youth but not in the way many seem to think," Davids said. "Rather, the detection has been the failure to teach them the meaning of discipline, self respect, respect and respect for law and order and the rights of others, consequently the lesson is now both painful and costly."

Davids observed, however, that "While the logical inclination is to be disturbed about youthful misbehavior, I want to make it clear that the vast majority of today's youth are deeply concerned about moral values. They have high standards of personal conduct and they respect law and order."

Those involved in criminal

4-Year-Old Gets \$1,700

A four-year-old Livonia girl who was injured by a neighbor's runaway automobile has been awarded a \$1,700 judgment by Common Pleas Judge Joseph J. Farnick.

Melissa Hammond, daughter of Mr. and Mrs. David G. Hammond, of 3004 Westfield, was riding her tricycle in front of her home when she was injured. The accident occurred on April 4, 1964.

It was caused when a car belonging to Mr. and Mrs. Gordon E. Kranning, of 3005 Westfield slid out of its driveway, across Westfield and struck Melissa. The car was unoccupied at the time. The girl, who since has recovered, sustained severe cuts and bruises on her face and body.

4,000 Give Advice To U-M "Dentists"

ANN ARBOR — Would you believe four thousand "faculty" members are at the University of Michigan School of Dentistry?

Would you believe they pay to teach?

If so, you aren't too far wrong.

Reports just furnished to Dean William R. Mann show that the clinical departments of the Dental School will have screened and treated more than 4,000 patients by the end of the present school year.

Each patient pays a modest fee in order to challenge graduate and undergraduate students with his particular dental problem.

For a few days or weeks, the patient becomes the most important "teacher" on the student's schedule. His health history and immediate dental difficulties, his responses to treatment, and his desires and demands show the student the human side of dentistry; typically, a lesson that is never forgotten.
