**If the thought of buying a new furnace bothers you, read this new Three-Step Protection Plan.**

First, call Edison. We'll give you the names of electric heat contractors near you. Each has been Edison-approved as capable and reliable. (And, right now, each will give you a \$150 trade-in on your old furnace if you convert to electric heat.)

Next, the contractor will check your home, review your needs, and recommend the type of heat best for you. He will estimate both installation and operating cost and give them to you in writing. All without obligation. We'll check the quotes if you like.

Then, after your new electric heat system is installed, Edison and your contractor will make any adjustments necessary to the system if operating cost exceeds the original estimate during the first three years of use. At the end of this time, if operating cost still exceeds the estimate, and you aren't satisfied, Edison will remove the system and refund your original price.

That's our new Three-Step Protection Plan. Remember the first step. Call Edison.
