## State To Send Out License Applications

LANSING—More than four million Michigan vehicle owners will have things easier when they go out to buy 1968 license plates this Nov. 1. They will have prepared license plate applications sent to them.

The prepared applications are part of the long-range program of mechanizing all driver and vehicle files by the Michigan Department of State.

"This program," says Secretary of State James M. Hare, "not only make it easier for vehicle owners to get their plates but, in the long run, will save tax dollars."

Automatic LHM Truck Division of Eaton Lay & Towne Inc. has broken ground in Livonia for the construction of the most modern and complete materials handling sales and service center in the Detroit area.

Automatic is the world's largest manufacturer of electric-driven materials handling equipment.

General Manager Edward A. Toomey of the Chicago-based division and Livonia Mayor Harvey Moskowitz welcomed shovels as contractors stood by to begin work on the 26,000 square foot structure at 13211 Merriman Rd. in Livonia.

Automatic was pioneer in the materials handling industry and traces its history to 1906 when it began business as Automatic Transportation Company, Buffalo, N.Y. The division has maintained sales and service facilities in the Detroit area since 1916.

Manager Bill Brancic said that the branch operation had outgrown its present quarters and that the new 3 1/2 acre site would let Automatic offer its customers the largest stock of electrical lift trucks available in Eastern Michigan.

Brancic said that Livonia offered an ideal location from which to service Automatic customers throughout Eastern Michigan. He also thanked Mayor Moskowitz for the cooperation he had received from city officials in expediting approval of building plans.

The new plant is scheduled to be in operation by April 15, 1968.

by Nov. 1.  
Applications were sent out the last time for the 1958 license plate year, Hare noted.

## Ground Broken For New Plant

## Hulsing Given New Post

Keneth Hulsing, industrialist and Plymouth civic leader, was elected president of the Schoolcraft College Foundation at the organization's annual meeting on Thursday night, Sept. 21 at the college.

Hulsing succeeds Northville attorney Clinton D. Hull, who served as first president of the Foundation which was organized last year as a citizen's group to provide financial assistance to the college.

Hulsing's election was the only change in the roster of Foundation officers for the year.

He was elected by trustees to serve during the coming year were: Charles E. Lowe, Garden City attorney, and Philip R. Ogilvie, Northville attorney, as presidents; George L. Clark, Northville secretary; Gordon R. Ramsey, Plymouth, treasurer; and Robert K. Barbour, Plymouth, assistant treasurer.

Officers were elected after the annual election of trustees. Trustees elected for three-year terms were Hulsing, Hull, Clark, Schoolcraft College President Dr. Eric J. Brudner, George Bauer, Plymouth; Robert Freydel, Northville; Mrs. Arjane R. Kogler, Northville; and Jan Reef, Northville.

Elected to a two-year term were William R. Keith, Garden City; Alex M. Lawrence, Northville; Mrs. Emile L. Switzer, Northville; James P. Thomas, Livonia; and Wilson S. Tyler, Northville.

Hulsing said vacancies on the board of trustees will be filled by appointment of the trustees at the October meeting.

The Foundation was organized to provide a source of endowment funds for the college to be used primarily for student financial assistance and to raise a portion of the local share of the cost of a fine arts building and cultural center on the campus.

ALL APPLICATIONS are being printed on the Department of State computer.

"We have already started the tremendous job of producing the applications," said Hare. "Our computer is now running around-the-clock, seven days a week to complete the job in addition to the other programs which are on the computer."

## Enlistments Liberalized

Army recruiting offices in Farmington and Plymouth have announced that young men previously rejected for enlistment or induction because of minor physical defects can discuss their cases individually with recruiters who can advise them of medical treatment available at Army expense.

A new Army regulation, termed the medically remedial enlistment program, permits enlistees plus selective service registrants who wish to volunteer to have certain physical defects treated to gain eligibility for military service.

The Farmington recruiting station is located at 2500 Orchard Lake Rd., and the Plymouth office is at 861 Penman St.

Men who enlist under the new system must agree to submit to therapeutic procedures necessary to correct the defects. None of the conditions should require more than six weeks of treatment before entry into basic training.

men in service

Airman 2/C David E. Hickmott, son of Mr. and Mrs. Charles F. Hickmott Sr., of 12865 Krutner, Garden City, is on duty at Da Nang AB, Vietnam.

Airman Hickmott, an electronic equipment repairman, is a member of the Pacific Air Forces.

Thomas Roger Ninnl, son of Mr. and Mrs. Donald C. Ninnl, 11720 Tecumseh, Redford Township, has been promoted to the rank of Private First Class at Ft. Sill, Oklahoma, Texas, where he has undergone training in the Army's Medical Training Center. After a two-week leave he is due to report to Ft. Lewis, Washington.

Pvt-E2 Adrienne Hicks, daughter of Mr. and Mrs. Arthur Hicks, of 35855 14-Mile Rd., Farmington, has completed both her basic and administrative training in the Women's Army Corp. In administrative training she finished with the second highest average in her class.

## McDonald Boosts Bill To Pay Police Benefits

The House has overwhelmingly approved a measure to provide benefits to state and local law enforcement officers or their survivors, when they are disabled or killed while apprehending a person who has violated a Federal law.

Because these men risk their lives in order to protect the lives and property of the citizens of Michigan, it is in the interest of this state to provide the police officer both financially and professionally.

The days that a policeman might have been pictured as having only provide ice cream to lost children are over. Today the policeman must exercise the acumen of a sociologist in dealing with explosive situations. Today the policeman must demonstrate the expertise of a constitutional lawyer in questioning individuals suspected of criminal offenses. Today the policeman must have the impartiality of a judge.

He is called upon to protect

the rights of demonstrators, and at the same time he is often the target of those who feel their rights are being denied. However, in the riotous cities of America, we often hear the cry of "police brutality." It is time to recognize that police do not cause riots; they prevent them. It is time to reaffirm our confidence in our Michigan Police Departments.

Throughout the United States, the men who constitute our first line of defense against the encroachment of the lawless deserve the respect and support of the citizens they swear to protect with their lives. The passage of the Law Enforcement Officer Benefit Bill serves as such a reaffirmation.

A specially prepared exhibit here in Washington on innovative solutions to urban school design entitled "The Schoolhouse in the City" will be shown in Detroit next month.

The display covers such dramatic facilities concepts as educational parks, school buildings situated over rail-lines, rivers and highways by using the air-rights over them; schools combined with commercial and residential structures; schools that incorporate other needed community functions into the educational complex; and schools that become the focal points for urban redevelopment in surrounding areas.
