

OAK GROVE

THE FINEST SUBDIVISION ON GRAND RIVER AVENUE

Lots are going rapidly on this allotment and there will be many new houses built next summer on this desirable plat.

These fine lots 50x200 feet in size can be bought now at the initial price, but they will doubtless be worth much more next spring. That has been the result with every other subdivision platted in Redford or, in fact, anywhere along Grand River.

I can sell these lots on very easy terms of payment and invite a call from those who are looking for a home site or an investment.

BURNS' RELICS ARE FOR SALE

Many Articles Intimately Associated With Life of Poet Will Soon Be Placed on the Market.

The Globe tavern at Dumfries, a famous haunt of the poet Burns, is in the market. Many a rich gold wily waltz was quaffed by the poet in this old hostelry, which contains numerous relics of the poet, including a window, on a pane of which by means of a diamond he wrote two verses, as well as a punch bowl, a jug, a cup, a Prince Charles wine-glass, Burns' favorite chair, Mrs. Burns' workbox and other articles.

An American visitor to Dumfries a few days ago endeavored to find out if it were likely that the pane of glass would be cut from the window and sold separately, as he was prepared to put down as many dollars as might be thought necessary. He was immensely disappointed when he was informed that such action would be looked upon as a sacrilege.—London Telegram to the New York Tribune.

SUCCESS IN THE HOME.

"There are two things that held me to my home like a vise," said one of the most successful men of the day not long ago—"to hear my father talk at the table, so that I never wanted to get anywhere else, and to hear my mother read in the evening so that I rarely wanted to go out. Those two things in our home life did more to start us five boys and girls off right than all the education we got in school or college." And all of those five boys and girls are now men and women prominent and effective in their different lines of work. Through the most effective method of education there is today, the indirect method, these children were sent into the world influenced by fine home talk and interesting home talk and interesting home readings. And in their soil lie the roots of true home progress.—Home Progress Magazine.

CAUGHT ON THE FLY.

"Pa, do the motor boats scare the sea horses?"
"Don't cheapen yourself, my dear; men don't care for bargains."
"Changeable? Why, she's so changeable she never wears the same complexion twice."

"The only things I dislike about Roger are his looks, his actions and his talk."

"Going fast? Why, he was going faster than a ton of soft coal."

"He's such a bore that if he was buried alive he'd worm his way out."

"You needn't think you're the sholf department store because you've a few notions in your head."

"No, ma'am," said the grocer to an applicant for credit, "I wouldn't even trust my own feelings."

RESOURCEFUL EDITOR.

"He late General Booth," said a Salvation Army official of New York, "often said to urge the 'down-and-out' to cultivate the quality of resourcefulness."

"He would illustrate this quality by means of a resourceful western editor who found one night that he had neither advertisements nor copy for his third page. The page accordingly appeared blank, with a note in small type at the top: 'This space will be useful for the children to write upon.'"

SCIENTIFIC DIET FOR HEALTH

Writer is of Opinion That Mankind's Present Fate Too Much Solid Material.

Now that many are interested in right living and maintaining the body in health it will be of great use to understand that all food and drink is air in different proportions and combinations. And these differences, it will be seen, are necessary for the maintaining of the various parts of the body in their right proportions, just as the differences on the earth and within it are necessary. As we are feeding our bodies now, we take too much solid material. If the earth was too solid the air could not circulate, and nothing could grow. When we find too heavy earth we lighten it. That is why we need to do with our bodies. Bodies, being mostly air and water, need but little solid food and most of the food should be such as is largely composed of air and water, like fruits and vegetables. Of grains and meats we need but little, and less in summer than in winter, less in warm climates than in cold climates.—Mabel Gifford Shine, in the Naturopath.

HAD HIS MONEY HID.

The Abbe Mario Costa, an eccentric priest of Genoa, has just died whilst undergoing treatment at the sanatorium of Ambi, near Lugano. By accident it was discovered that his long black coat was lined with Italian banknotes to the value of \$3,000.

NICELY FITTING.

"It was a very appropriate birthday present our young friend, the lawyer, got, wasn't it?"

"What was the present?"

"A new suit."

REAL GRATITUDE.

The panhandler accented the sporty-looking man and was somewhat surprised when the latter produced a half-dollar and handed it over.

"Yes," said the panhandler, "four bits! Will you have a drink with me, pardner?"—Cincinnati Enquirer.

THOUGHT SHE HAD.

Patience—What's the hen cackling about? She hasn't laid an egg.
Patrice—No; I guess she's absent-minded.

NO GAMBLER.

Patience—Polly says she believes marriage is a lottery.
Patrice—Poor thing! And she's never had a chance!
