THE MOTORIST'S PLIGHT

A stranded motorist and the passengers use their muscles to free their vehicle in Farmington Township Saturday morning. The late season snow storm dumped up to eight inches of the white stuff on the area forcing the cancellation of many Saturday plans.

SNOWMOBILE works fine in the heavy snowfall Friday and Saturday but the auto couldn't move on the streets in Livonia. This was a typical scene over the weekend — then came Monday's 60 degree weather and the white stuff vanished quickly.

Tests Determine Future Mechanics

ANN ARBOR—Ever wonder who will be doing repairs on your new car in two or three years? The Automobile Manufacturers Association (AMA) asked itself that question thanks to a project just completed at The University of Michigan, it should soon be able to know the answer.

In the past it was possible only to predict that about 5 percent of today's young boys would enter the field of auto repair. Now a new test makes it possible to predict which spot cent will enter the field after high school, and thus permit more effective counseling.

Financed by a \$140,000 grant from the AMA in 1957, the department of vocational education and practical arts in the U-M's School of Education devised the aptitude test for ninth and 10th grade boys.

THE TEST, entitled the National Aptitude Survey, was conceived by Drs. Joseph W. Dorton and George L. Kait.

Sourpuss with false teeth now laughs loudest

"Because of terrible yellow denture stains and bad breath, I always held back from smiling. Everyone called me 'sourpuss.' DENTUR-KLEEN foaming tablets changed all that! One tablet in a glass of water made the difference. All the stain and offending food particles were foamed away. My false teeth have never looked so clean and white, felt so fresh. I can smile and even laugh again thanks to foaming DENTUR-KLEEN available at all your Cunningham Drug Stores."
