Only 77c

ACCREDITED—Principal Jay W. Formisio and Research Director Anthony Aquino, of Stevenson High School, are welcomed to the nation's largest regional accrediting agency, the North Central Association of Colleges and Secondary Schools. Greeting them is Herbert W. Stricker, president of the association and Dean of faculty of the University of Missouri.

Strikes Set 17-Year Mark in The U.S.

WASHINGTON—Strike idleness in January declined slightly from December, but was at the highest level for the month since 1950. Two-fifths of the month's idleness was attributable to six major stoppages, including the prolonged copper strike. Preliminary estimates of the U.S. Department of Labor's Bureau of Labor Statistics indicate that 310 stoppages, involving 135,000 workers, began in January. Strikes continuing from December brought the total number of workers directly affected to 211,000. Strike idleness, at 2.5 million man-days, amounted to 0.21 per cent of total working time, compared with 0.24 per cent in December, and 0.11 per cent in January 1967. Four of the six stoppages, in effect in January and involving 5,000 workers or more each, began during the month—a 1-day strike of taxicab drivers in New York City, and stoppages at American Tobacco Company plants in Kentucky, North Carolina and Virginia, General Motors Corp., Saginaw, and bituminous coal mines in Ohio, Pennsylvania and West Virginia. In addition to the copper strike, a stoppage at Detroit tool shops continued from December. The copper and bituminous coal mine stoppages continued into February.

School Payrolls Hold 2 Million

National surveys show that more than 2 million people—or one out of every 100—are teachers or hold a fulltime paid position with the nation's public schools. The latest report was drafted by the National Education Association based on census and school estimates for 1967-68. "With the nation's total population having reached 200 million in November," the NEA report said, "approximately one person in 100 in a public school instructional staff. This compares to 1965 when teachers, principals, supervisors, librarians, guidance and psychological personnel." The report, based on a nationwide survey in which state departments of education participated, also showed the number of pupils enrolled in public schools has increased by 1.9 per cent over the enrollment for 1966.
