

Tool House Can Hide That Clutter Garage Can Be Converted

Just the thing to do away with that clutter of flower pots and garden tools around the back door or in the garage is a tool house set toward the rear of the lot.

Can Be Converted

One of the most practical ways to add living space to a house is to convert an attached garage.

The basic structure is already there, and the finishing work can be done economically with wall, ceiling and floor materials that the home craftsman can handle readily.

The biggest problem may appear to be how to replace the unsightly garage door. But stock wood windows of penderosa pine will solve that one.

A wide choice of attractive styles — double-hungs, casements, bows and bays, sliders, awnings and hoppers, which combine view and ventilation — are available from lumber dealers.

If a door is needed, choose a style that matches the house design. Penderosa pine panel doors and complete entrances are carried in many stock sizes and styles. They're chemically-treated against weather abuse.

For interior walls, wood paneling with stain or natural finishes is offered in unbelievable variety. Composite types carefully to help you choose one that is genuine and warm.

Stuffing children with vitamins is easy—just grow a few plants of the small-fruited tomatoes: Red Cherry, Red Pear, Yellow Pear, Yellow Plum. The youngsters simply cannot resist popping the little fruits in their mouths and down go the vitamins.

These dome-shaped paper caps or their larger sized counterparts are the perfect covers for seeds of early crops.

A pinch of cabbage seeds scattered over an area small enough to be covered by 1 cap, then covered, will produce transplanting-size seedlings

To repair shower leaks, apply a clear epoxy coating to the shower floor and six inches up the walls. The epoxy should be the type used for waterproofing basements.

Tips For Gardeners

If you had trouble in your last year's garden with the diseases called aster "yellow" or aster "rust," there are several things you can do to prevent trouble this year.

The first is to plant aster seeds where no asters have been grown before. The second is to buy seeds of a will-resistant variety (stated in catalog and on packet).

The third is to spray the asters with Sevin once a week to kill the leaf hoppers which spread aster yellows from one plant to another.

Do you know that there is a bi-color corn with some kernels yellow and some white? One variety is named Butter and Sugar; it is of super eating quality. Just think how this corn will confuse your neighbors!

Failures with zinnias, one of the easiest flowers to grow, are almost always due to sowing the seeds too early.

Zinnia seeds rot when soil is cool and damp. Wait until soil is warm, then sow the seeds where the flowers are to bloom, thinning later and transplanting the thinned plants if you wish.

Set a cap over each plant after transplanting and hurry the crop along.

If you had a planting of sweet alyssum in your garden last year, gently remove the browned skeletons of last year's plants and don't disturb the soil underneath.

Chances are excellent that this annual has self-seeded and that soon innumerable seedlings will sprout in the same place.

Everything in NURSERY NEEDS

DO YOU NEED A CHANGE OF PACE? Well, get out of the house... get out of the car... get INTO the yard, and enjoy "Mother Nature." Plant a tree, a shrub, a vine, some flowers and watch her wonderful work. There's nothing more exciting than planning and giving a growing thing T. L. C. (that's tender loving care). Then watch it bloom and develop and enhance your yard.
