Do-It-Yourself-Save

Easy-To-Build Patio

The outdoor living season is at hand. Here are six easy steps to help make your summer more enjoyable with a new concrete patio. If you're experienced, you can handle the job yourself. Otherwise relax and call your concrete contractor.

Step 1. PREPARE THE BASE
Select your patio area carefully to suit your needs. Fully excavate the area to the depth you want it. Stake out the area to help you visualize its appearance. Remove the topsoil and any debris to top soil. Compact loose soil with a tamper or heavy roller.

Step 2. SET THE FORMS
Your concrete patio can be laid in almost any shape: square, circle, diamond, or free form. For a 4-inch thick slab, use 2x4 boards on edge, nailed together to form the shape into the ground. The top edge of the forms will be the surface grade of your patio. Be sure that water will drain properly.

Step 3. ORDER CONCRETE
After the base is prepared and forms set, call your local ready-mixed concrete dealer to order the concrete for your building and that you want to use concrete with 6 percent air. This will give you enough concrete to do the job. Be sure to have enough help to mix and pour the concrete when it arrives. Wait until you are ready to place the concrete before the dealer arrives.

STEP 4. PLACE THE CONCRETE — Place the concrete as near as possible in its final position. Use a shovel to move concrete from the central pile. Spade the concrete thoroughly to help consolidate it. Avoid overworking the concrete. It will stiffen if it sits too long resting on the forms as shown here. This insures a flat, smooth surface. Lay down enough concrete ahead of the slip to fill in all low spots.

Stagger Plantings Of Summer Bulbs

No article on summer-coming bulbs would be complete without mentioning glads, art planting now and repeat two-week intervals several times more for a longer season bloom.

If you like the very big ones, let the plant show type. For indoor use, however, more moderate-sized varieties are available and for arrangements of miniatures. For colors consult any good plant catalog or your local garden center.

For planting, prepare the soil in your space for a vegetable garden. Spade up the soil at least 8 inches deep, incorporate thoroughly a 2-inch layer of manure in most areas and 3 to 5 pounds of any good vegetable fertilizer per 100 square feet, and level it.

Then dig your furrows and plant the bulbs 6 inches deep and 6 inches apart in rows 18 to 24 inches apart or in irregular clumps in the flower or sub-border.

NEXT MOST POPULAR ARE the dahlias. Here there is also a choice of height, giant or dwarf, thera, white with maroon markings and the montbretia in yellows, reds, browns, orange, etc. The acidanthera is also sweetly-scented. Wonderful for cutting. Plant 4 inches deep and 4 inches apart.

Friendly Gate

A garden gate should be doorlike—an inviting entrance, not a barrier. For an open appearance, good privacy, design and assurance of spaced slats nailed together, try the following:

For something really unique try the Ugridia, three horizontal petals, with a deep cup in the center and spotted like a leopard in the cup. With slightly more moisture than the others it will produce many blooms. Plant like acidiantheras. All

Hamilton Shows A Profit For The First Time

Keith Owens, chairman of the board and chief executive officer, said the company has \$24.6 million of insurance in force after less than four years of operation, with assets of \$24.6 million.

● KITCHENS
 ● BATHROOMS
 ● RECREATION ROOMS
 ● ROOM ADDITIONS
 ● COMPLETE
 REMODELING

announced that this is a significant accomplishment as much as most new life insurance companies do not have a statutory profit until approximately the seventh to eighth year.

reams indicated the reasons
 such a noted profit could
 tributed to the continuing
 excellent efforts of the
 many's sales force, econo-
 mizing in operations
 during the past year, and to
 contributions made by the
 institution of Wayne National
