

Fallout Survey Good

Michigan has been credited by the Census Bureau with an 85.6 per cent response to the recently completed home fallout protection survey of 2,299-190 one, two and three family households in the state. Col. Frederick E. Davids, State Police and state civil defense director, reported.

This score represented fallout protection analysis data reported in 1,969,146 returns. Of these, 1,122,948 were mailed questionnaires while another 846,198 reports were done by Census Bureau enumerators through interviews.

The mail canvass rated an overall response of 77.3 per cent from a mail-out of 1,452,998 questionnaires.

A PRINCIPAL purpose of the survey was to advise households in confidence of the fallout protection offered by their homes.

A companion benefit is that the availability of protection for people in their homes will importantly assist in community shelter planning.

Of the 1,969,146 returns analyzed, 1,911,385 were for households within the scope of the HFPS program. Of those, 1,510,668 or 79 per cent had basements. Households without basements numbered 400,718 or 21 per cent. Specially built fallout shelters were reported from 16,637 dwelling units.

PROTECTION FACTORS and total reported occupancy were given as follows for the households with basements:

Rated with PF 40 or higher were 97,012 dwellings occupied by 224,137 persons.

There were 1,309,689 households ranked in the PF 20 to 39 range, total occupancy 4,622,686.

In PF 10 to 19 range were 134,356 households with 437,661 occupants.

Dwellings rated less than PF 10 in protection numbered 9,611 and housed 32,956 persons.

While most of the dwellings were rated below the federally accepted standard of PF 40 for public fallout shelters, it was pointed out that the 1.3 million homes with basements in the PF 20 to 39 range nevertheless do provide significant protection for their occupants.

A standard of PF 40 in a building or a basement means that an occupant would be subjected to only one-fortieth of the radiation that would endanger him in an unprotected area.

ALL PARTICIPANTS in the survey were provided with civil defense plans and information on how the protection offered by their homes could be upgraded at little expense.

The HFPS program, conducted by the Census Bureau with the assistance and cooperation of federal, state and local civil defense personnel, began in Michigan last October and was concluded in March. Information for this summary was provided by a final computer run in April at Census Bureau facilities at Jeffersonville, Ind.

THIRTY-SEVEN or more than half of the 72 Michigan city areas qualified for the mail canvass had questionnaire response rates ranging from 80 to 89 per cent.

High was Fillmore, part of the Holland city survey, with 89.2 and no mail city had a response rate less than 85.4 per cent.

Cities with 80-84 rates: Allen Park 83.9, Ann Arbor 80, Bay City 80.4, Birmingham 82.6, Dearborn 82.9, East Detroit 84.1, East Lansing 84.5, Escanaba 84.3, Ferndale 82.7, Garden City 82.2, and Grand Haven 83.7.

Grand Rapids 80, Grosse Pointe Farms 82.6, Highland Park 81.4, Ironwood 81.6, Livonia 84.2, Madison Heights 81.3, Macquett 81, Menominee 82.5, Mt. Pleasant 81.7, Oak Park 83.5, and Owosso 81.

Roseville 80.9, Royal Oak 83.8, St. Clair Shores 83.4, St. Joseph 80, South St. Marie 80.5, Southfield 84.6, Southgate 82.7, Treston 84, Warren 82.9, and Wyoming 84.3.

New Developments In Electric Irons

The popularity of durable press and synthetic fibers has brought about related developments in electric irons.

Some new ones come with two special settings for "touching up" durable press items after laundering—one for dry ironing, and one for steam pressing.

KRESGE'S Father's Day Specials

Men's Knit Acrylic® Pull-overs
Our Reg. 3.93 **2.33**
