Seniors Choose Square Dances

A Grand March, Square Dance, and Folk Dances highlighted the seniors' "Salt and Pepper Shake" dance last Saturday night. The dance, held under way at 8:30 with a large attendance of students. For entertainment the students started out with a Grand March and directly after the students grabbed their partners and swung into a square dance with folk dances following. The rest of the evening was spent on regular dancing to the latest popular tunes in the juke box.

The decorations were based mainly on football. There were colorful pennants and streamers attached to the side of the hall. A centerpiece of footballs hanging down from the ceiling. All students signed a large scrap-book as they entered the dance. Hot dogs, cake, and potato chips were served in the cafeteria for refreshments. With the senior advisors chaperoning the dance and everything going off as planned — how could the dance help but be a big success? N. H.

Looking for POWER?

Better Buy Buick!

THAT bold banner that stretches out before your eyes on a 1950 Buick isn't there just for show.

Lift it up, and you'll find that the space beneath is abundantly occupied, by one of the biggest hooftools of power you'll find in any motorcar.

What you're looking at is Buick's modern version of the high-compression valve-in-head engine, which gains extra wallop from the fact that it uses the exclusive Fireball combustion principle.

We could list a lot of mechanical reasons why fuel gives up extra power in a Fireball engine—how it's wrapped in a swirling, ball-shaped charge—how it burns with a smooth, clean thrust that delivers maximum action.

But the best way to find out what all this means is to touch off the eager horsepower out on the highway by a gentle nudge of your toe—and feel your shoulders press deep in the cushions behind them.

Now all this sounds thrilling, you say, but how about the feed-bills for all these horses? How about miles-per-gallon?

Only BUICK has Dynaflow Drive* and with it goes! HIGHER-COMPRESSION and with it goes! SUPER-MEDALS • NEW, Fireball valve-in-head power in three engines. (New F-263 engine in SUPER models) • NEW, PATTERN STYLING, with MULTI-GUARD fender-to-fender • TRAFFIC-HANDY SIZE, fast overall length for easier parking and progress through traffic • EXTRA-WIDE SEATS, short turning radius • SOFT BUICK RIDE, low-crodded between the axles • SAFETY-RIDE rim, from all-clip springs, safety-ride rim, pressure tires, ride-decloding torque-tube • Standard on ROADMASTER, optional on extra-cost SUPER and SPECIAL models.

The practical answer to that one is found in this year's experience with the SUPER and SPECIAL—and even the ROADMASTER.

In all three, the horsepower was stepped up at the start of the year—and in all three, happy owners report the best mileage in modern Buick experience.

This is due to a little-known but authentic engineering fact—which is that an engine burns less gas when it doesn't have to labor. At any normal driving speed, therefore, extra power is extra thrifty.

So we say again—if you're looking for power—mighty power—buoyant power—silken power—thrifty power—better buy Buick.

Your Buick dealer is eager for the chance to demonstrate how sound this hint really is.
