**You Can't Build A Better Mousetrap!**

"They're not the best-looking boarders a man ever had," Hack Turner said one day, "and they've got awful tempers. But I've found it pays to have 'em around."

Hack was talking about a family of barn owls, nesting in his silo this year. Some folks believe those little white-faced screechers kill chickens—and ought to be shot on sight. But Hack disagrees.

"Up at State University they've studied barn owls for years—and never known one to eat a chicken. On the other hand, a daddy owl will clean up around 300 mice a month. Farmers that kill barn owls are throwing away the best mousetraps known to man!"

From where I sit, when someone shows a prejudice against any group of animals or humans—it's usually just based on misunderstanding. For instance, some folks are plumb intemperate about those of us who enjoy an occasional quiet glass of beer. Get to really know us and you're liable to find we're pretty good birds at that!
