Hunters Use 65 Shells For Sky, One For Goose

A lot of "skyshooters"? State game men at the Swan Creek station report hunters shot nearly 34,000 shells in bagging 516 geese. This was about 56 shells expended for every goose taken here in the waterfowl season which ended November 15.

According to the conservation department, last year hunters harvested 700 of the birds in that goose concentration area.

YULE DECORATIONS CAN BE DANGEROUS, FIRE EXPERTS WARN

Safety as well as beauty should be a consideration in your choice of Christmas decorations, the National Board of Fire Underwriters advises.

Combustible decorations contributed to one of the worst fire disasters of modern times, when 99 people died at a Christmas party in Newfoundland in 1942, the organization points out. Many home fire tragedies have also resulted from this cause.

Non-inflammable decorations of glass and metal are now generally available, the National Board says. Families can also obtain "snow" for use around the Christmas tree which will not flare up when touched by a flame.

The organization emphasized the importance of selecting Christmas tree lights which bear evidence of listing by Underwriters' Laboratories, Inc. Candles should never be used on the tree or around the house, and decorating the tree with cotton or paper is also extremely dangerous, the National Board observed.
