Diving Ducks Move

Diving ducks now are beginning to move into Michigan in numbers, the conservation department re-

vere better than in were cetter than in the opening period last year. Fleid men check ed 661 ducks and 286 coots as com-pared to 524 ducks and 143 coots

The maximum of 300 shooting permits were issued each day as compared to last season's 291 the first day and 112 the second.

Upper Peninsula Foliage Keeps Down Bird Kill

enciens continues through Octo-ther 20, rabbits through March 1. So far this year's toll, by, 623 Conservation department field there is only 3,340 acres, as com-men report heavy foliage, muddy back roads and excessively wet to flooded conditions all contributed in holding down the size of the hunting force and the game kill. Let Potatoes Dry Before Picking Them Up

Scientist Examines Effects Of Radiation

Effects Of Radiation

Three years of research by Michigan State College physiologists have shown that 'bodily damage from radioactive materials is apt to be less severe in certain abnormal animals than in those which are normal.

These results have been obtained in a three-year study, financed by grants from the 'Atomic Energy Commission, under the direction of physiology and pharmacology and Commission, under the direction of physiology and pharmacology and that radiation damage to the bones was much less in rats with rickets and rats with either light or low thyriodosom than it was in rats without rickets and with a normal throad balance.

A spell of drier weather and a faster disrobing of trees and bushes would improve uper peintsula
hanting which got off to a poor to
mediorer start the first tew days
with fall.

Season or ruffed grouse (partindicates continues through Octothe 20, rabbits through March 1.
