The LOUVERED FENCE

takes more time to build but the results are interesting. Use 1"x6" boards. The angle is determined by placing each edge of the board flush with the rail. Cut a 2"x2" block for uniform spacing of the boards as illustrated. This style of fence may be built with one section on top of the other; see illustration.

If you could look at your home from this angle, you'd realize how much you depend upon your roof for protection. It stands between you and the hot sun, rain, sleet, snow — so it must be reliable, trouble-free.
