How to tell when your shocks are bad.

You can feel when your shocks start to go. Your car will go "thunk" when you hit a pothole. Every railroad track will feel like a washboard. And your car will tend to rock and sway even under normal driving conditions. If your shocks are over two years old, odds are they should be replaced with a set of Delco Pleasurizers. You can try Delco Pleasurizers on your car for 90 days. If your car doesn't ride and handle better from the first day—you can have your money and your old ride back. Delco Pleasurizers—the modern replacement for worn shock absorbers—have these outstanding features:

- Genetron® gas-filled cushion
- Nylon-skirted piston
- Low-pressure multi-lip seal
