

# SC Maintenance Classes Offered

The accent will be on classes in maintenance this fall in the Schoolcraft College related instruction for industry, which includes apprenticeship programs.

This is good news for supervisors of companies who have maintenance employees for heating, air conditioning, and refrigeration equipment, according to Ronald J. Monfette, director of the programs.

"Specifically, we are offering a brand new course in

refrigeration theory, a course in the fundamentals of heating, air conditioning and refrigeration, a course covering the national electric code, and a course in plumbing regulations," he said.

The four courses will be offered in the fall semester which begins Aug. 24. Registration for these and the 52 other Related Instruction classes will be held two days earlier at the college.

Monfette has arranged class schedules so that appropriate

support courses may be taken in relation to the four accented this fall. Heating, Air Conditioning and Refrigeration (course no. RI-371) will be given from 5-7 p.m. Mondays; Refrigeration Theory I (RI-378) from 7-9 p.m. Monday and Tuesday; Plumbing Regulations (RI-372) from 10 a.m. to 12 noon on Thursday, and from 7 to 9 that evening.

The class in National Electric Code (RI-220) will be given on Thursdays from 7 to 9

p.m. Students taking these classes will attend just one session weekly, and enrollment is open to others than apprentices and trainees. THE NEW COURSE covers theory in both refrigeration and air conditioning systems. Operational trouble shooting will be analyzed, and realistic problems described and resolved.

The director reports that space is still available for 10 to 12 students in each of the maintenance classes.

AT METTETAL AIRPORT -- Visitors from England were at the Plymouth airport Thursday to spend a day flying with local pilots from Livonia and Farmington. They are part of a group of Air Force Corps and Combined Cadet Force students visiting the United States; they have

been hosted by Observerland families and toured local points of interest. They are (from left) Robert Shuler, Flight Lt. R. T. Williams of the RAF, Ian Findlay, Nigel Norrie, Christopher Ranger, and David Golliffe. (Observer photo by Doug Johnson)

## Show Airs Candidate Interviews

What is Chippendale furniture? There were three cabinet makers named Chippendale: Thomas, his son and his grandson. They designed and made all kinds of furniture in a great variety of designs. At first their furniture was heavy in scale, but gradually it became lighter. Their favorite material was mahogany. He often designed whole interiors, which were very elegant using rich fabrics with soft but definite colors -- yellows, green-grays, and sometimes lacquer red.

Whole interiors can be designed with the help of the decorating service at SCHRAEDER'S HOME FURNISHINGS, INC., 111 N. Center St., Northville, 349-1838 or 825 Penniman, Plymouth, 453-8229. We have Colonial, Traditional, Mediterranean and Modern furniture by nationally known companies. Although each store is in the heart of the towns of Northville and Plymouth there is plenty of parking behind each one.

GEORGE L. CRAVEN

## Craven Is Commission Candidate

George L. Craven of Van Buren Township announced his candidacy for the Democratic nomination for county commissioner in the new 27 district which includes Plymouth City and Township and Canton Township.

In announcing his candidacy, Craven said he wants area representation to influence county road commission plans for the Willow Run airport industrial transition.

He also said he wants reorganization of the county board to achieve a more efficient administrative body and careful planning in the expanding areas of Wayne County.

A graduate of Cass Technical High School and the University of Michigan School of Architecture, Craven is employed as an architect and involved in planning and budget control.

His professional memberships include the American Institute of Architects, Engineering Society of Detroit and Construction Specifications Institute.

He is also one of the founders and first chairman of the Belleville area Human Relations Council, past president of the Lake Crest Civic Assn., vice president of the Van Buren - Belleville Democratic Club.

Interviews with the six candidates for the 2nd Congressional District Democratic nomination will be aired in a special program on Channel 56 on Sunday. The program will be shown for the second time on Sunday, Aug. 6, at 4:30 p.m. The second showing was underwritten by the United Auto Workers.

The program features interview with the six candidates conducted by four reporters, including Kathy Moran of Observer Newspapers Inc.

The candidates include: Bill Brown of Ann Arbor, Matthew Echols of Lambertville, Frederick Schwall of Ypsilanti, Walter Shapiro of Ann Arbor, Rep. Marvin Stempin of Livonia, and Bill Turner of Ypsilanti.

The primary winner will face incumbent U.S. Rep. Marvin Esch (R-Ann Arbor) who is running unopposed in the primary.

## Duncan Sent To Texas

LIVONIA Airman Richard R. Duncan, son of Richard L. Duncan, 1494 Gary Lane, Livonia, has completed Air Force basic training at the Air Training Command's Lackland Air Force Base, Texas. He is assigned to Sheppard AFB, Texas, for training in the communications field. He is a 1971 graduate of Bentley High School.

It is one of the miracles of modern technology that natural gas can now be made. hydrocarbons into natural gas; the Marysville Plant will start operation in 1973. By 1974, we expect the plant's output to reach 210 million cubic feet of gas a day, increasing Consumers Power Company's gas supply by more than 20 percent. And Consumers Power is preparing to make natural gas to help meet the growing demands of more than 880,000 customers in Michigan. Although we continue to find new underground sources of natural gas, we also are building a gas reforming plant near Marysville in St. Clair County, like the scale model shown above. Using a unique process to change liquid gas into natural gas, the Marysville Plant will start operation in 1973. By 1974, we expect the plant's output to reach 210 million cubic feet of gas a day, increasing Consumers Power Company's gas supply by more than 20 percent. By manufacturing supplementary gas, and prospecting for new gas reserves underground, Consumers Power is bending every effort to meet Michigan's need for clean-burning, dependable natural gas.
