Employees of the D. U. R. are riding on new transportation tickets since the first of the year, the green books having been discontinued and card passes issued in their place. An especially large congregation heard Rev. Steven on's sermon at the M. E. church last Sunday evening, when he chose for his subject, a timely New Year topic, "The New Chance". Mrs. W. P. Payne entertained on last Saturday evening in honor of Miss Lucile House of Jackson. The evening was spent by the young people in games and various amusements. Edgar Perce, Howard Warner, Murray Moore, Mark Owen, Ed Eldemeister and Chester Pickett.

Chas. Paulger, president of the Clarenceville Dairymens Association, was in Farmington Monday, and while in town called at the Enterprise office and added his name to our subscription list. The effort that Mr. Paulger is making in the line of bigger organization among the milk producers in the community in which he lives, is worthy of more than passing notice. He not only tells what organization and co-operation, and the application of figures will do, in getting profits from the milk business—he has figured it out and produces the figures. If more farmers would operate along the lines followed by Mr. Paulger, more farmers would be able to show bigger profits at the end of the year.

The new milk ordinance is to be found in another column of this issue. Another ordinance prohibiting meddling with water hydrants is also published.

How Much Service Can You Get From Your Typewriter?

It's what a machine does, not what it costs, that is most important. All typewriters do not have the same efficiency and the same operator does not get the same result on every writing machine.

The L. C. SMITH & BROS. Typewriter will produce ten to twenty per cent. more work than any other typewriter ever made. How is this possible? Here are a few reasons:

1. It is ball-bearing throughout—others are not.
2. All operations are controlled from the keyboard.
3. It is the lightest touch machine made.
4. It does not "smut" the carbon.
5. The ribbon reverses automatically.
6. The type is so protected that it is not battered by collision.
7. One motion of the hand returns the carriage and operates the line space.
8. It has an inbuilt biller and tabulator.
9. No trouble to write on paper as small as a postage stamp.
10. It is built for service.

Send for illustrated catalog.
