## Mild Laxative for Baby Free

The child of today is the parent of the future, and whether it grows up healthy and strong, or puny and weak, depends upon the intelligence of its parents, for most children are born into the world healthy and strong, but become feeble, weaklings between birth and the age of ten, when the parents are still in greatest control. The entire cause of trouble is in the stomach. A baby that is drooping its head, looks listless and does not grow, but the little child whose stomach is good, grows plump and strong, and is a good example for all other children. A good nursing child grows well at its mother's breast, and its mother and its mother's health, and that means it has no constipation.

The best and safest way to cure any irregularity of the stomach and bowels in children is by the use of Dr. Williams' Pink Pills. This is a mild laxative, and it is the only one that is safe for children. It is a blood purifier, and it is the only one that is safe for children. 100 Printed Envelopes, 50c.

Letters and other mail frequently miscarry, or are held for postage, and for that reason farmers, as well as business men, should have their name, address and rural route printed on their envelopes. If this is done and the letter fails to reach its destination or is unclaimed, it will be returned to the sender instead of being consigned to the dead letter office.

The Enterprise is printing high-grade envelopes at about as low a price as they can be bought at retail unprinted, and we have many styles to choose from. Let us get you out too (the high grade kind) for 50c, or 100 envelopes and 100 neatly printed letter heads, put up in pads of 50, for \$1.00.
