Devoted to the upbuilding of Farmington and Oakland County

Anyway, the ice bill hasn't been very high this summer. Whaddaya mean, summer.

The next big casualty list will probably be ready for publication on or about July 5th.

And now comes the noxious weed orders from the various highway commissioners. Have you cut yours?

Potato bugs are said to be uncommonly scarce this year. However, they will not be missed so much with army and war bugs bugging around in profusion. And then there's the baseball bug working overtime.

Henry Ford set another precedent this week, when he petitioned the Dearborn council to take in part of his adjoining estate, within the confines of the village, his only motive being that he might help pay the running expenses of that village, which finds itself short this year, owing to the loss of two saloon licenses. It is probably the first case on record of a man wanting to pay more taxes.

Congressman Kelly is not in favor of a larger army, if his remarks last Wednesday evening are correctly construed, but he very decidedly is for building and maintaining a big submarine and airship fleet. The congressman contends that with a proper equipment of submarines and aircraft, this country need fear no attack from across the ocean enemy. As he has been making more or less of a study of coast defenses, he is in a position to know rather a good deal about what he is talking.

The idea is not an entirely new one and certainly "listens good". The people of the country in the main, however, are not so much interested in the details of what we are to have for national defense as they are in "how soon" are we going to get it.

Soft drinks—all kinds. Briggs Confectionery.
