# SENTENCED TO Hard Labor for life

It seems as if about 80 per cent of the American women have been sentenced to hard labor for life, the way they have to drudge and work once every week when "wash day" comes round, and the worst of it is that there's no excuse for this back-breaking drudgery that puts wrinkles where dimples ought to be and makes women old before their time. There's a simple, easy, inexpensive way round—a way to get out from under wash day work—do it better and quicker.

## Thousands of American Women have Escaped from the toil of Wash Day by putting in "Electric Maid" Washing Machines

The "Electric Maid" is an automatic servant that never grows tired. It works week in and week out whenever its needed, at a total electric current cost of one cent per hour or less. And when it isn't running it doesn't cost one cent. As for the purchase price, the "Electric Maid" Washing Machine pays that back in labor and time saved the first six months you use it.

# Electric Maid

makes the things you launder last longer because it washes them without wearing or tearing or rubbing or ripping. It handles the articles gently but efficiently and turns out the sweetest, cleanest wash you've ever seen. There is no other washing machine like the wonderful "Electric Maid". You'll have to see and use it to fully appreciate its merit. Sold under an ironclad guarantee, that says "money's worth or money back" and means what it says. You'll find the "Electric Maid" in some of the finest homes in America and in some of the humblest. No matter how rich or how moderate your circumstances you can't afford to be without one.

Better drop in at our store and ask about it. It will open your eyes to just how perfect a washing machine can be.
