# SKINNER'S HISTORIC SPAGHETTI

36 Age Respe Book Free

### 300 Hitters

"You can't get no base hits with your bat on your shoulder."
That's what Lord Byron told Lar-T Doyle when that "son of swat" protested loudly and long as the umpire waved him out on a third strike that cut the plate.

When Police Captan Patrick Costello met a man on the main street
of Dobbs Ferry loudly and Joyfally
dusturbing the peace of the historic
hamlet, he said: "My friend, you're
drunk, and Til have to run you in.

The stranger drew a tattered Bible
from his pocket, and, leading the captin to the nearest street iamp, readwith fervor: "First Timothy, readwith fervor: "First Timothy, and
the said with the said of the said and
thought blindly he said: "What were
you're the said of t

you drinkin'?"
"Well," replied the stranger, "the
last one was beer."
"Then," said the captain, "you lose
on a technicality, and it's come with

on a technicary,

so the stranger, who said he was
John Hasch of the Bowery, New
York, was locked up to await the
morning session of the police court.—
Cincionati Times-Star.

Afraid of Sharks.

BIII—Nearly one-third of the entire surface of the gibte is covered by the Pacific ocean.

JIII—But what's the use if the sharks are going to keep us out of the water?

It is the home life, or lack of it, that papes the child life.

## **Brightens** One Up

There is something about Grape-Nuts food that bright-ens one up, infant or adult, both physically and mentally.

What is it?

Just its delightful flavor, and the nutriment of whole wheat and barley, including their wonderful body and nerve building mineral ele-

William Shaw was too dend to appreciate it.

Shaw was a quiet, industrious, God, fearing man who occupied one side of a double house in Edinburgh, and the fearing man who occupied one side of a double house in Edinburgh with a percent of a double house in Edinburgh with a percent of the fearing man who occupied one side of a double house in Edinburgh with a percent of the fearing man who occupied one side of a double house in Edinburgh with a percent of the fearing but foces as her favorite a man who was unworthy. He was fond of holding high wassall with reckless companions, he locked upon honest toil as a nuisance, and there were many stories concerning his criminal exploits. Catherine had winning smiles for this undestrable citizen, but she had reckled with the worked like Sam Hill and can be talked with the worked like Sam Hill and can be talked with the worked his sam to the work of a careful with the worked his same and agreeable. Many a damsel longed to be his bride, but he yearned for Catherine and Catherine yearned for her black sheep.

It is not jettrange that William Shaw was grieved and aggrarated. Any saw and same parent would be inceased not same be talked to Catherine, and the work of the worked his part of the worked his part of the work of the worked his was a note written by considerable property. He had no bad habits and he was handsome and agree able. Many a damsel longed to be his bride, but he yearned for Catherine and Catherine yearned for her black and a same parent would be inceased not same be talked to Catherine for the same of the work o

and Catherine yearned for her black of the double house and any at time he talked to Catherine, pleading and arguing with their, tring to induce her to apprediate the lost his temper once in a while, when the girl stubbornly protested that when any at time he talked to Catherine, pleading and arguing with their, tring to induce her to apprediate the lost his temper once in a while, when the girl stubbornly protested that her lost his temper once in a while, when the girl stubbornly protested that her lost his temper once in a while, when the girl stubbornly protested that she'd marry the man of her choice of the anold maid.

The other side of the double house they are the course right across the street. The other side of the double house was occupied by a man and Marrison, and it seems clear that Mr. Morrison could repeat from memory was coupled by a man and house and the street was completed to the street of the

DRYING OFF HEAVY MILKERS
High-Producing Animals Are Difficult to Mandis—First Stop is to Change Cow's Feed.

The customary method of drying off the average dairy cow is simply to onit every other milking until the milks flow diminishes, and then sking still it stopes entirely. Sometimes the process will require two or three weeks, but usually less. A cow producing less than ten pounds and exceedingly Joyous.

### LACK IN MINERAL NUTRIMENT

Dairymen Advised to Feed Cows Ma-terials Rich in Calcium Mag-nesium and Phosphorus.

nesium and Phosphorus.

Dairy cows fed the usual winter rations cannot produce large milk yields without loss of minerals from their skeletons, writer Dr. E. B. Forbes of the Ohio experiment station, bastig his statement upon recent investigations of the department of nutrition. From his results he advises dairyment of the continues of the department of nutrition. From his results he advises dairyment of the continues of the department of nutrition. From his results he department of the department of the continues are not breed may be due to mineral depletion, he continues. In his experiments different rations varying in milk yell or a failure of the continues. In his experiments different rations varying in milk rations were fed to heavy-milking Holsteins. More calcium, magnesium and phosphorus

Excellent Type of Hostein.

Excellent Type of Hostein.

We given off in the milk and excreta
than were present in the feed, although the cows maintained their live
weight during the experiment, and
stored sulphur and nitrogen.
Doctor Forbes says that the cow
must draw upon her bones to supply
this deficiency, because her capacity
to produce milk is much greater than
her ability to digest minerals. The
farm foods which are richest in
minerals are the legumes, feeds ore
all deficient in time Line may also
to added to the mild milk of the
bone flour or as calcium carbonate.

### BETTER QUALITY OF CHEESE

Principal Cause of Sourness is Use of Overripe Milk-Condition Can Be Prevented.

Much can be done at the farm in helping to produce only the best qual-ity of cheese, which will command the highest price, give complete satisfac-tion to the best class of trade, and pro-vent loss to the cheese factory.

nignest price, give complete sutifaction to the best class of trade, and prevent loss to the cheese factory.

During the summer one of the most common complaints from the trade is due to sour or acid cheese. The pricipal cause of sour cheese of overripe most and the source of overripe most and the source of t
