**Pickels Mark Anniversary**

Mr. and Mrs. Don Pickel recently celebrated their 25th wedding anniversary in the First Baptist Church of Garden City.

They were married Dec. 4, 1948, in the old First Baptist Church, Middle Belt Rd. at Beechwood. The Rev. Irving Rose who performed the ceremony, is still pastor.

Friends and relatives attended, including the Pickels' children - Jim, Nancy, Susan and Pamela.

Members of the Detroit Edison Glee Club, to which Pickel belongs, entertained along with the First Baptist men's quartet.

MRS. ALTA MOORE, (left) and Mrs. Roberta Steele show the Soroptimist-donated doll stands that will be used in the Plymouth Historical Museum. (Observer photo by Harry Mauthe)

**Soroptimists Stand Up Dolls For Museum**

Stands for the antique dolls being readied for display in the new Plymouth Historical Museum have been donated by the Soroptimist Club of Plymouth.

The gift is just one of the projects the club has undertaken in recent months to offer services to the community.

Mrs. Alta Moore, Soroptimist service products chairman, said the organization also will work with the Historical Society in its campaign to raise funds through distribution of decals.

Two other projects benefit youth in Plymouth.

The Soroptimists, Mrs. Moore said, are arranging a program to recognize good citizenship among grade-school children and also are expanding a clothing service program for needy school youngsters.

Ladies: Read all of this, it will be worth your time.

**WAVE OF THE FUTURE.**  
The Trichoperm System's unique blend of science and fashion is the latest giant step in the history of permanent waving. You have only to recall pictures of your grandmother with her hairstating up in a tortured, Madusa fright wig of electric cords and coils to realize how far permanent waving has come in the past 60 years. Machine waving, then cold waving in all its successive improvements, still left much to be desired. With one of the true innovations in the art of hair waving, The Trichoperm Warm-Waving System overcomes many of the negatives of conventional cold waving and establishes a new set of superlative standards.

**TOMORROW IS NOW**  
A professional formulation, Trichoperm is here today at your salon. Thanks to Trichoperm your hairstylist can create the most fashionable of the simplest style and make it last. Thanks to Trichoperm many of the things you dislike about permanent waving are things of the past.

**TRICHOPEERM LOOKS DIFFERENT, IS DIFFERENT**  
The Trichoperm System of internal, style-holding support is Redken's latest triumph in the Scientific Approach to Hair Care. Your hairstylist will be glad to detail its many advantages. And remember, many of the things you disliked about permanent waving—you can forget. And the difference is simply beautiful. The Trichoperm Trichoperm System is all new, utterly different. Infinitely better. It's a new experience for today's woman on the go with no time to bother with resetting and rearranging. No time for yesterday's harsh perms and frizzy curls.

**A New System of Permanent Waving Without Ammonia.** Trichoperm's new Protein-Bonding System. What we've tried to do with Trichoperm is to reform the hair while keeping it close to its natural state. So the secret of this warm waving system lies partly in what it has, partly in what it doesn't have. One thing it doesn't have is the harsh, damaging ammonia found in most perms. (You certainly don't want something strong enough to remove paint and floor wax applied to your hair and scalp!) Another harsh element missing from Trichoperm is alkali. Instead of operating in a drying alkaline base, Trichoperm works within what your hairstylist will tell you is a "low pH," close to the natural pH range. This is a slightly acidic base very compatible with the slightly acidic surface of healthy hair and skin. On a pH scale of 0-14 where the low numbers are acid and the high alkaline and neutral pH 7 (neither acid nor alkaline), Trichoperm registers 6.5. That's far below the destructive alkaline levels common to many conventional permanent waving solutions. Because the natural pH of the hair is so closely maintained, no neutralizing is necessary since one of the main purposes of neutralizing is to bring down the high pH of alkaline waves so they won't be so damaging to the hair.

**MORE ON THE PLUS SIDE.**  
The unique attributes of the Trichoperm Warm-Waving System also include balanced amounts of protein, hydrolyzed to the right size and weight for absorption into the hair. The result is that your hair combs out easier, is more natural looking. Curly or straight, any style you choose looks natural with this style-holding perm.

**THE NEW VOCABULARY OF TRICHOPEERMING.**  
When explaining The Trichoperm System to you, your hairstylist will speak to you in a new language—the language of today. You will now hear terms like "bonding," "reforming" and "invisible, internal style-holding support" in place of "neutralizing" and other conventional perm terms which no longer apply. Because with Trichoperm your hair is "reformed," not "waved," it is "bonded" not "neutralized." This Trichoperm talk will give you a clearer understanding of how Trichoperm can give you the loveliest, most satisfying, long-lasting style ever.

**TRICHOPEERMING—ALL YOU'LL EVER NEED TO KNOW.**  
Instead of using damaging ammonia and harsh alkali, your hair is treated with a milder Protein-Bonding Lotion. During this new warm-waving process, once your hair is wrapped you are placed under a dryer where heat completes the reforming process. When the reforming is completed, your hairstylist uses a Protein-Bonding Lotion containing hydrolyzed protein and bonding agents. Simply stated, these two steps (reform-and-bonding) create invisible, internal, style-holding support of your favorite hair style, and allow the absorption of protein to promote better hair condition. This is accomplished without the irritating, pungent ingredients common to conventional permanent waves that can be as hard on your hair as they are on your nose.

... No matter what salon you go to or what hairstylist, if she can permanent wave properly, ask her for a... Trichoperm.

If she doesn't have it ask her if she will get it for you. You won't be sorry you did.
