When you invest upwards of $9,000 in a car, you deserve more than a status symbol.

There is an obsolescence built into most cars—European or domestic—that has nothing to do with how strong they're built.
It's called boredom. And it has to do with the way they drive.
Most cars simply are not built to perform in such a way that driving becomes an end—not merely a means of getting somewhere.
BMWs, on the other hand, are.
If a single generalization could be made to describe all BMWs, it would be that each is a unique combination not only of the refined luxury you'd expect in a costly European car, but also of the extraordinary performance you'd expect only in a sports car.
Technically, the Bavaria is a combination of an utterly sophisticated 3-liter, triple-hemispheric combustion engine, legendary suspension, totally reliable performance, innovative safety features, efficient use of fuel, and practical use of space.
But as truck, the Bavaria is as much a product of a state of mind about building cars as the certain way it performs. In an age of mass produced status symbols, marketing geniuses, and styling breakthroughs, the engineers at BMW concentrate on building the best driving machine it is physically and technically possible to build.
Irrespective of passing fashion or price.
And the result is so unusual, that the editors of Motor Trend magazine flatly proclaim it to be "unrecalled among the world's automobiles."
BMW automobiles are available in a full range of two-and four-door models, from $13,597 to $5,653*.
Bavarian Motor Works

The ultimate driving machine.
*Prices suggested base retail FOB East Coast, subject to change and exclusive of options, transportation, dealer preparation, state and local taxes, if any. Prices slightly higher FOB West Coast.

Most cars simply are not built to perform in such a way that driving becomes an end—not merely a means of getting somewhere.
BMWs, on the other hand, are.
If a single generalization could be made to describe all BMWs, it would be that each is a unique combination not only of the refined luxury you'd expect in a costly European car, but also of the extraordinary performance you'd expect only in a sports car.
Technically, the Bavaria is a combination of an utterly sophisticated 3-liter, triple-hemispheric combustion engine, legendary suspension, totally reliable performance, innovative safety features, efficient use of fuel, and practical use of space.
But as truck, the Bavaria is as much a product of a state of mind about building cars as the certain way it performs. In an age of mass produced status symbols, marketing geniuses, and styling breakthroughs, the engineers at BMW concentrate on building the best driving machine it is physically and technically possible to build.
Irrespective of passing fashion or price.
And the result is so unusual, that the editors of Motor Trend magazine flatly proclaim it to be "unrecalled among the world's automobiles."
BMW automobiles are available in a full range of two-and four-door models, from $13,597 to $5,653*.
Bavarian Motor Works

The ultimate driving machine.
*Prices suggested base retail FOB East Coast, subject to change and exclusive of options, transportation, dealer preparation, state and local taxes, if any. Prices slightly higher FOB West Coast.
