"I got most of the stuff on your list," announced my daughter who had volunteered to go grocery shopping.

"But I couldn't find any pan, sags. What are they, anyway?"

That item on the grocery list I had prepared didn't sound familiar, so I looked.

"That's powdered sugar," I told her. "See, it says Pow Sugs. I wanted two boxes."

On another occasion, she came back with one item not crossed off the list.

"I couldn't read it," she said, "so I went around the store looking for what it might be." She thought of tinned tuna, winged cars, maybe rinsed cans.

It turned out to be canned corn. Extremely simple to read, I thought.

My family maintains I should have gone into medicine—I can match any physician in the matter of illegible handwriting.

When I'm away from home and send them postcards they thank me properly but I'm sure they don't try to read them.

The man of our house asks that I please use the typewriter for any grocery lists or missives he might have to understand.

And the family isn't alone.

At the office, as I approach vacation time each year, I start making the supreme effort to be slightly legible so that the person who sits at my desk has some notion of what's going on.

I even run into a bit of trouble myself if I wait too long to read the notes that I make to myself.

Somewhere back there I should have learned to write, I guess, or taken a course in shorthand.

Since I didn't, we're stuck with strange notations and grocery lists that include chess cr, collage ch, grip, brd and q wat. It's a wonder we ever have anything edible in the cupboard.
