## Heating the outdoors wastes natural gas CHECK YOUR ATTIC—PROPER INSULATION SAVES FUEL AND MONEY

The greatest heat loss is through your roof. So one of the best ways you can help conserve natural gas (and save money, too) is to make sure you have at least six inches of high quality insulation in the attic of your home.

(We have a free booklet with answers to questions about home insulation. Stop by and pick one up. Then talk to your insulating contractor, or to us about installing insulation. We can recommend qualified contractors...we can even arrange financing for you. It's all part of a Michigan Public Service Commission program to help conserve scarce energy.)
