

the YARD-MAN easy life CLEAN-UP SYSTEM no. 2

The Vac Sweep gives you power over the most tiresome jobs around your home... the clean-ups. They not only vacuum leaves and debris from your lawn, but they'll clean up your driveway, sidewalk, patio, even your garage. Easy wing-nut height adjusters and handle-mounted throttle control lets you fit the suction to the job. And with the Vac Hose Attachment you can easily clean up behind bushes, in corners, or in gutters. It can even help clean out your car... the simpler, the better.

Bag-it rear catcher kit

Model 3700 with Bag-it

Bag-It turns your Yard-Man riding mower into the most complete lawn care combination available today.

Bag-It uses any standard 3 mil 30-gallon disposable garbage can liner. As the bag fills, leaves, clippings and debris are settled and packed letting you put up to 60 pounds in one disposable bag.

When the disposable bag is finally full, just flip up the conveniently hinged top, slide the bag away from the catcher, and tie it up, and replace with another disposable bag. It's the easiest handling debris has ever been.

Bag-It also works well without the disposable bag. The polyester outer bag can be filled directly, and emptied quickly and completely with no lifting, carrying or dumping. Just drop the back panel and push the debris out. Perfect for people with a convenient dump area nearby.
