

Farmington Hills officials and friends had their first glimpse of a sculpture fountain which Dr. Allen Zieger has given to the city. The presentation was a garden reception at the doctor's Southfield home. (Staff photo)

Witchcraft for breakfast

Gundella, Detroit area's resident witch, says, "Casting spells has nothing to do with the supernatural or these ancient skills."

Only you can cast your own spells, so stay away from people who charge money for this. They are frauds."

Gundella will come to the Farmington Community Center for a breakfast get-together Friday, Oct. 3.

She is a descendant of the Green Witches of Scotland and an active member of an ancient coven in Ann Arbor. Her travels have taken her throughout the state appearing as story teller, lecturer and entertainer.

She has been a school teacher for 22 years and did her undergraduate work at Central Michigan University, Wayne State and Michigan State. Her graduate work was done at Eastern Michigan.

Tickets for breakfast with Gundella are available at the center, 24705 Farmington Road.

Herb's ace

Herb Goldman of Southfield recorded a hole in one during a round of golf at Southfield's Evergreen Hills Golf Course Sept. 10. Goldman accomplished this on Evergreen Hills' No. 7 hole, a 145-yard par three. He used a pitching wedge.

14 students are semifinalists

Fourteen students from the three Farmington area high schools have been named semifinalists in the 1976 National Merit Scholarship Program.

To become finalists, the students must receive the endorsement of their schools, confirm their high Scholastic Achievement Test (SAT) scores on a second examination, and provide evidence of their academic and other accomplishments.

Saving energy is a family affair

It takes a lot of energy to keep you in hot water.

Most of us don't realize that next to space heating, water heating is the biggest user of energy in the home. That means every time you shower, bathe, or do the wash or dishes, you're not just using up water, you're using up lots of energy, too. So keep the showers short, wash only full loads in your washer and dishwasher, always use cold water when it will do the job as well as hot. If you hear a drip...drip...drip...check your hot water faucets. When you save hot water, you save energy — and money.

Today, everyone is aware of the need to conserve energy. To help we are offering a free booklet, "It Makes Sense to Save Energy." Stop in and pick up your copy. At Consumers Power, we are working diligently to keep up with your energy needs. But there's none to waste.

USE ENERGY WISELY
