**CUSTOM ZERO
CLEARANCE
WOODBURNING
BUILT-INS**

by Preway

Now any home or apartment—new or old—can have a real woodburning heat-producing built-in fireplace at less than half the cost of a masonry

fireplace. The Custom Built-in can be put practically anywhere. It's easily framed in directly on wood floors, without special supports, and next to combustible materials. Custom Built-ins are available in three firebox opening sizes: 36", 42", and 48". Open-end models are also available, in either right-end or left-end open styles. Built-ins come complete in one carton with refractory base and firebrick back, porcelainized side walls, heavy duty insulation, fine mesh pre-pleated firescreen, and positive seal damper...all ready to get in place and frame in. Facing materials can be whatever you choose to create a high-fashion pleasure center in your home.

A home-away-from-home for Vogel's toddler

(Continued from page 16)

windows for the front door which adds warmth to the otherwise dark front hall. When he couldn't find just the right light fixture for the kitchen, he made one of his own design based on a dodecahedron.

Mrs. Vogel's contributions include charming macrame panels for the kitchen windows and many examples of her woodcuts. Her studio is cleverly concealed in the kitchen area behind floor-to-ceil-

ing doors. Everything has a place in this well-planned area.

Outside the house are other efforts to include art into the scene. The couple's son has a play structure designed and built by his father from which is flown the son's special flag designed and made by his mother. It already has its own addition to provide even more play space. It is his home away from home.
