

the YARD-MAN easy life CLEAN-UP SYSTEM no. 4

The Yard-Man Snowbirds patterned after the snowthrowers that open the snow-choked Rocky Mountain passes. Rugged, reliable, hard-working, and equipped with the only truly unique feature on any snowthrower. The Super Chute!

On conventional snowthrowers just the top part of the discharge housing revolves. The main section is rigid. On the Snowbird the entire discharge housing rotates. Besides giving you much greater flexibility in placing snow, this design keeps the chute opening squarely in front of the impeller fan no matter what direction you're throwing.

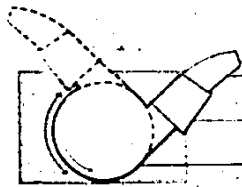

They straight line throwing is why Snowbird is so hard to clog, even in slushy snow. And because a Snowbird is so hard to clog, it offers you a unique degree of operational safety.

CONVENTIONAL DISCHARGE HOUSING

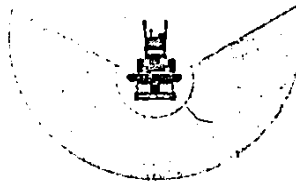

On conventional snowthrowers, the entire discharge housing is rigid. The only part that moves is the top section. This limits the chute opening to a narrow range of angles. The result is a limited throwing range.

THE SUPER CHUTE

The Snowbird's Super Chute is a rotating discharge housing. It allows the chute opening to rotate through a wide range of angles. This gives you a much greater throwing range. The result is a much greater throwing range.

Top view of Snowbird's throwing range

The Snowbird's Super Chute is a rotating discharge housing. It allows the chute opening to rotate through a wide range of angles. This gives you a much greater throwing range. The result is a much greater throwing range.
